ON ne pouvait proposer à un Canadien français, comme objet d'un message interuniversitaire, de sujet plus attrayant que l'esprit national au Canada.

Seulement, il se peut que la ligne qui sépare Ontario de Québec divise autre chose que les propriétés et le territoire. Sur ce sujet en particulier du nationalisme canadien, il semble bien qu'il n'y ait pas accord entre les esprits dirigeants des deux provinces voisines.

D'après les écrits qui nous viennent d'Ontario, le nationalisme se confondrait avec l'unification. Et il n'y aurait pas d'union au Canada sans l'unité de langue, de croyances et d'enseignement.

Ai-je besoin de dire que nous, de Québec, nous comprenons le nationalisme tout autrement? Il consiste pour nous dans un amour de privauté pour le Canada tout entier, mais aussi dans un attachement presque égal à la province dont chacun fait partie, à la race dont il est membre, à la langue et à la foi qui sont celles de cette race.

Pour les Ontariens donc, nationalisme semble bien vouloir dire unité dans tous les domaines. Pour les Québécois, il signifie renforcement de l'unité politique par rapport au Canada, mais aussi maintien de la diversité ethnique, religieuse et linguistique, dans chacun des groupes.

Qui des deux a raison? Le seul argument que puissent invoquer les Ontariens, c'est la nécessité de créer une union plus parfaite entre les citoyens par l'assimilation du pays à l'Empire dont nous sommes une colonie. Malheureusement, ils oublient deux choses. Ce qui fait la gloire et la force de l'Empire, c'est précisément la diversité de ses groupes nationaux dans l'unité de son autorité politique. Et puis, l'unification que l'on préconise ne pourrait se produire qu'à la condition, pour les groupes, de consentir à sacrifier les éléments essentiels de leur vie. On ne fonde rien sur l'annihilation de droits et de devoirs établis par la nature même.

Québec, au contraire, asseoit sa doctrine sur une double base. La province se rappelle que le document fédératif de 1867 ne fut pas un traité d'absorption signé entre un vainqueur et un vaincu, entre un supérieur et

un inférieur, mais un pacte d'alliance entre deux groupes de race différente, mais égale. Et les cinq articles de ce pacte furent: le respect par l'un et l'autre de leurs droits particuliers, l'accomplissement par l'un et l'autre de leurs devoirs mutuels, la constitution dans ces limites d'une seule entité politique pour ce qui est des intérêts communs, le maintien de plusieurs entités politiques séparées par leurs intérêts provinciaux, la survivance dans chaque province des caractères propres à chacun des groupes qui la composent.

C'est pour avoir ainsi compris l'acte de 1867 que Québec s'est assuré, entre ses groupes si divers, une paix et une harmonie que lui envient les autres provinces. L'école étant la seule pierre d'achoppement où s'affrontent les divergences ethniques, il a donné pour base à son système d'éducation la liberté absolue dans le double domaine de la croyance à enseigner et de la langue dans laquelle l'enseigner. Puis, pour appliquer ce principe dans l'ordre financier, il partage les crédits publics assignés à l'école proportionnellement au nombre d'enfants qui, les fréquentant, appartiennent à telle confession ou à telle race. De la sorte, toute occasion de conflits se trouve supprimée, pour ne pas dire que justice intégrale est faite à chacun.

Québec n'a qu'une ambition: c'est de voir toutes les provinces comprendre ainsi le pacte fédératif et lui donner cette application pratique. Il est sûr qu'alors tous les citoyens du pays seront d'autant meilleurs Canadiens, d'autant plus attachés à l'autorité centrale qui les gouverne, qu'ils seront plus fidèles à conserver les caractères religieux ou linguistiques par lesquels ils se distinguent en tant que groupes nationaux.

C'est le voeu que forme, du plus profond de son coeur,

Le recteur de l'université de Montréal,

Mr. Asa Pette P.A.

A CANADIAN national spirit has already been created. Go from Halifax on the Eastern Coast to Victoria on the West and you will find a pride in and a love for Canada. Those who went through the War remember how man drew to man, when each saw the magic word "Canada" on the shoulder of the other. It mattered not from what part of Canada each came. But the maintenance of this Canadian spirit is more difficult than in most countries. We are so large, our geographical situation is so difficult, we have such a small population and there are so many varying interests to divide us into groups. The Maritime Provinces feel isolated. Quebec differs in race, tongue, social and, in a measure, religious conditions. Ontario juts down into the heart of the United States with a distinct type of people and commercial interests that are often hard to reconcile with the agricultural interests, especially of the West. The people of the Prairie Provinces stand by themselves, separated by a great wilderness from Ontario and by a barrier of mountains from British Columbia, whose easiest access to a neighbour is to the South. These geographical difficulties are increased by our racial difficulties, both those long established and those occasioned by recent immigration. But in spite of these handicaps the Canadians have built a young nation with an individuality of its own. We are held together by common origins, by a common loyalty to the British Crown, by a common government, by similar methods of education, by church organizations, by trans-continental railways, by banking systems. And no small part in the forging of these links of our Dominion life has been and will be played by the university graduate. They form the professional material that fills in and stabilises the spiritual framework of our national life. For four years or more as undergraduates they have been drawn together in studies that unite; their minds have been centred upon the humanities and the sciences that civilized mankind hold in common; but they have also

had their thought directed to the history and accomplishments of our own people. The universities and the colleges are homes of the most genuine patriotism; their studies bring students together in common purposes and for common ideals. They get their training because of the liberality of founders and benefactors such as have been and are the people and legislatures of the provinces. In gratitude therefore for what you have received, with thankfulness for your Canadian home, and with a high purpose to hand your inheritance to the next generation enriched by your own effort, the graduates of 1924 will, I am sure, go forth resolved to strengthen all that is best in our national life.

*R. A. Saleme.*

President, University of Toronto.

THIS spring there are issuing forth from the various colleges and universities of Canada 4,000 young men and women bearing certain engraved scrolls and other symbols marking them out from the many hundred thousands of others of the same age, as learned in the arts and sciences, and in the course of events and their causes, and in the ways and thoughts of all peoples. Marshalled as phalanx they could overcome in argument and debate any concourse of people that could get within hearing range, and subdue them to their way of thinking. Scattered as they will be in units or small groups in communities from Sydney to Victoria, what can they do to compel right thinking in these communities for the good of this Canada of ours?

What can they do to produce a national spirit amongst us? I assume that we agree that such spirit does not yet maintain in Canada, much as some persons would like to make us believe that it does by merely predicating its existence. I believe that the finest effort they could put forth would be to do their part to make Canada a conscious, as it is a geographical, unit. There can be no real common opinion, no real "Canadianism" among us until each part knows the other, its aspirations and its achievements, its virtues and its failings. We do not now understand each other, even communities as near and as near-allied in origin and development as Torontonians and Nova Scotians. The reason is chiefly geographical and is not far to seek. An example of what I mean is the spirit underlying the well-known twitting of the Eastern man by Sir Richard Cartwright, when he dubbed the Maritime Provinces the "shreds and patches" of Confederation. The Maritimer might well have replied that usually the patch was the stoutest portion of the breeks. But it would not have far advanced their knowledge of each other. What was lacking was the spirit of desire for knowledge of each other. There can only be national spirit when we know what we all have in common. What we have in common is our abiding heritage, our uniting band. In my opinion, therefore, what the graduate of 1924 can do for the common good is to get knowledge of all of Canada; sympathy and understanding will follow; and the coming years will produce the desired spirit of common purpose and ideals, the Canadian national spirit.

A. STANLEY MACKENZIE  
*President, Dalhousie University, Nova Scotia.*

CANADA may fairly be said to have aspirations toward nationhood. And as fairly may it be said that much time and effort will be required before the slowly developing ideal matures into a definite reality. We are not impressed by the frequent appeals to constitutional developments which are held to establish beyond question our status as a nation. We must search for something approaching a true national spirit in Canada. And in the search we must not confuse national sentiment with the very real appreciation of our place in the British Empire, however comforting and satisfying this appreciation may be.

The outlook in Canada is unfortunately sectional. The Western Provinces are united in a demand for "Western Rights." Just recently elections were won in Nova Scotia and New Brunswick on a cry for "Maritime Rights." Quebec has always had "rights" without which it would be impossible to present "a solid Quebec." If Ontario has not had "rights" as well, it is because she has been satisfied with her "dominant" position in the Confederation and does not need to raise an issue along this line. All of which is the antithesis of the national spirit and opposed to the development of national solidarity.

The cure, if one is to be found, must lie in a breadth of view and in the development of a large sense of citizenship in our future leaders—the men to whom we must look for the direction of public affairs in the next generation. Our people must be lead to think in terms of Canada as a whole. University men are in the best position to acquire the essential breadth of outlook and, as citizens, have a serious responsibility to face. It is good to know that Toronto men are thinking along this line and if the graduates of the present year will devote themselves whole-heartedly to the development of a feeling of national solidarity and of pride in Canada as a whole, they may accomplish much that is worth while and they will assuredly have the sympathy and support of all those who wish well for the future of their country.

C. C. JONES  
*Chancellor, University of New Brunswick.*

**C**ANADIAN National Spirit—that is something we talk about, something we all agree in regarding as essential in our national life. Sometimes, however, I fear we do not equally all realize the very real difficulties in the way of the attainment of this great ideal.

Inhabited Canada consists of at least four well-defined and unfortunately separated areas. Beginning with the east there is the group of the three Maritime Provinces with interests and problems of their own. Then there is the Quebec-Ontario area, fairly united geographically, but unhappily divided in sentiment. Going west we must cross the tumbled rocky desert north of Lake Superior before we reach the great fertile plains of Central Canada; and again a towering mountain barrier must be traversed before we emerge on the genial Pacific slope of British Columbia. These regions all possess distinct natural frontiers and are difficult of union. So much for geography.

History, too, in a sense is against us. Not that our past is either dull or insignificant. On the contrary, it is extraordinarily picturesque and interesting. The trouble is that history is a slow business, and the growth of a united national sentiment can, in the last analysis, come only as the product of historical evolution. This demands time, not decades, but epochs. England and Scotland and France and Spain have each developed an individual and deep-rooted national feeling, but the process has been going on for a thousand years. A national spirit worthy of the name cannot be induced overnight by the waving of a wand.

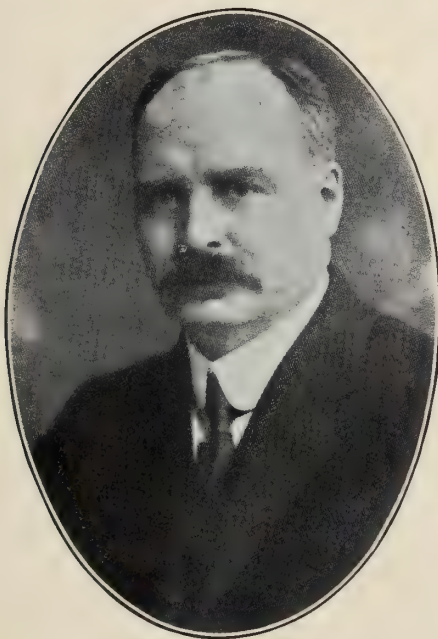

Canadianism is now found most intensively developed in the Province of Quebec, whose native ancestry goes back three hundred years. Here we reach the crux of the whole matter. To be concrete: the way, as I see it, to lay the foundations of a cohesive and lasting national spirit in Canada, is to develop first towards our French-speaking fellow citizens a mood of understanding, of good-will and of sympathy. They were living here a century and a half before we came; they are sprung of a race as proud and as ancient as our own; they are the heirs of a civilization that was old when ours was young.

Once and for all, let us forget our prejudices, our suspicions, our superiorities, and unite ourselves whole-heartedly with this staunch and sturdy people, to have and to hold the great northland we have jointly inherited.

Then, in spite of geographical obstacles, living together with our compatriots in amity and mutual esteem, we may confidently leave to time the certain evolution of a noble and vital national spirit in our beloved Dominion.

W. A. R. KERR

*Acting President, University of Alberta.*

**G**RADUATES of a university are specially endowed by training, culture and native intelligence to be leading citizens in the communities in which they reside and to them, more than to any other class of persons, we look for the exemplification in their lives of unselfish service devoted to the interests of their own particular district, the province in which they live and Canada as a whole. This dominion expects each university graduate to make some important contribution towards raising the standard of Canadian life and citizenship. In a country such as ours, composed of descendants of different races, with its varied climate, diversified resources and widely-different physical features, it is necessary for every patriotic citizen to exert his best efforts to remove all genuine cause of discontent or dissatisfaction that may be found in any section of the country, whether such feeling be due to differences of race or religion or to some unsolved economic problem. This most western province which faces on the Pacific Ocean and the countries of the Orient, and is separated from the rest of Canada by a high range of mountains, has economic problems to solve different from those of any other province. The questions of immigration, finance, rural development, education, etc., in all the provinces call for the intelligent and sympathetic consideration of the most broad-minded citizens of our country to the end that Canada may grow into a strong, populous and progressive country. To university graduates the country looks for a lead in the development of a truly national outlook.

Now that the stress and strain of the Great War is over and the swing of the pendulum is towards the intensive development of the arts of peace, may the members of the graduating class of 1924 consecrate themselves to the important task of developing a national attitude of mind friendly to all countries and an abiding faith in the future happiness and prosperity of our great dominion.

J. D. MACLEAN

*Minister of Education, Province of British Columbia.*

**A**T no period in the history of Canada, nor in the graduation of students from our Canadian Universities, could there have been a more onerous or serious responsibility placed upon such graduates, owing to the conditions which prevail within Canada—and in fact throughout the world—than is the case to-day.

With a true vision of the possibilities of this our great country, and also with the equipment which your graduation this day must have placed within your grasp, you should be enabled to deal with the various problems which confront all patriotic citizens of our Dominion. I am sure you will take a broad and ample view in national affairs, and a wise vision in Empire matters.

**W**HAT Harvard, Yale and Princeton were and are to the other universities in the United States, Toronto, McGill and Queen's are to the universities of Canada. The American universities set standards of scholarship, provided trained men for the professions and filled the chairs of the newer universities with their graduates. In return, every State in the Union sent its quota to the older universities both for undergraduate and graduate work. These universities are national in a sense that the larger and richer universities founded in the last half century have never become.

It may have been that the tide of migration from New England through New York down the Ohio and across the Mississippi River carried not only men trained in the older universities but traditions of universities and university learning that held men who had never seen or attended a university. Harvard, perhaps more than Yale or Princeton, represented to them all that was highest and best in the intellectual life of the people.

A similar migration has given to the older Canadian universities an even greater opportunity and influence. The professions of Western Canada, the educational systems of the Prairie Provinces are manned mainly by eastern graduates.

Though engaged as you will be in the more personal occupations of your lives, consider that service to the community should be the first object of your activities; and though in these days we have to equip ourselves at the cost of time and money in order to take our proper share of the responsibilities of our civic life, still the full object of all who train must be the advancement of the country and community in which we live, and the well being of the British Empire, to whom we, as citizens, owe so much, and to whom we are indebted for so many of the privileges we now enjoy.

CHARLES CANNON

Minister of Education, Province of Manitoba.

There is a danger that the eastern universities may not realize how quickly their younger sisters have fitted themselves for the undergraduate work formerly done by them and fail to adjust themselves to the new conditions and still retain leadership in those phases of university work which cannot be done in the newer universities.

In the United States a movement from West as well as East set towards Germany because the older universities were unequal to the task of providing proper facilities for graduate work in the liberal arts and sciences as well as in the professional subjects. A similar movement from Western Canada to the United States and Europe is in evidence.

Within a decade much has been done by the older universities. More would have been done had not the War consumed much of the nation's financial resources. Much remains to be done in adapting existing facilities, freeing capable men for research and graduate instruction and in attracting ambitious students to the East.

W. C. MURRAY

President, University of Saskatchewan.

## Valedictory

---

IT is with a feeling of mingled regret and pleasure that we, the graduating class of 1924, contemplate the approaching June Convocation; regret that, when we leave the University we are forced to sever the many pleasant ties and associations we have made during our stay as undergraduates; pleasure, because we are attaining to the ultimate goal, the prime objective of our span of student life.

The years we have spent here have not been dull. On the contrary they are among the happiest in our lives. The University has much to offer besides the purely academic, and the social and athletic phases of its life prevent the student from becoming too one-sided. Of all these things we have taken full advantage.

We have seen four important years of the University's life. When we entered it was just recovering from the effects of the Great War and the senior years were scanty in numbers. Now we find more applicants for entrance to the University than can be accommodated; so many that the standard of entrance has been raised. This enthusiastic demand for higher education is a living sign of the strength and ability of Canada and of the country's confidence in the University. The fame of our University is steadily growing. Important additions to knowledge and scholarship are being made every year by members of the University and by graduates. To them go our congratulations for the great work they are doing and our hopes for still greater successes.

It is a matter of pleasure to note that building operations, interrupted by the war, are now in full swing. The beautiful Memorial Tower, now in the process of erection, is a fitting tribute to those men of the University who gave up their lives in the cause of Right and Justice. The completion of the new

Trinity College is being eagerly awaited in order that thereby may be welded the last link in the chain of the closer union of all the colleges and faculties in the University; for it is only by the true co-operation of all its component parts that the University can remain successful.

It is important, however, that we realize that in quitting the life of the University we are entering upon the life of the nation, important because the two are closely connected. Lord Byron is reported to have said, "Tell me what the young men of the universities are thinking to-day and I will tell you what the history of the nation will be for the next fifty years." These words instil in us an appreciation of our position in the state and our duty towards it. Canada is a fast growing nation; she is in need of active men and women of education and ability to help her in her task. It is for us to see that the supply is not lacking in order that our country may not have to look elsewhere for those to whom she is to entrust the fulfilment of her destiny. Let us not forget that the University of Toronto is the Provincial University of Ontario, the most important Province in the Dominion.

Finally, to all that the University of Toronto includes and signifies, we bid farewell, some forever, others, more fortunate, only in the official sense, but all with a feeling of deep affection towards the group of buildings where we spent our undergraduate days. To the staff, whom we shall remember for their true scholarship, their helpfulness and their kindly interest in us, to our fellow-students, with many of whom we have formed indissoluble ties of friendship, to all connected with the University we say "Valete."

# To the Graduating Class of University College

by

PRINCIPAL HUTTON

---

There is nothing so obscure and baffling as "nationality." President Wilson believed in it and almost made it a "fetish" in his resettlement of Europe, and as a result Europe is suffering from a new form of old disorders, new minorities suffering from the harshness of new "nationalities." Hungarians crying out against Roumanians (instead of Roumanians against Hungarians) and Italians against Serbs and Serbs against Italians (instead of each of them against Austrians).

"Nationality" works most smoothly in Great Britain owing to its tolerance, and in France, Germany and Italy, owing to their comparative homogeneity: but what does

"nationality" mean in Ireland or in the United States or in Canada or in any country conspicuously made up of different racial elements?

There is an interesting book about Michael Collins now in the library. It shows how Arthur Griffith looked forward to a day when Irishmen would all feel themselves to be Irishmen, though 400,000 in the south and 800,000 in the north-east cherish different traditions of race and religion and language from their "predominant partner," from the majority of the Irish Free State.

If his ideal is realized ever it will be because a common love of the same island-home is sufficient to constitute an Irish "nationality."

This seems a hard saying to many Irishmen of the Republican party; they want some more concrete and tangible unity: they suggest that to the common-island home must be added a common Gaelic language, a common Gaelic culture and traditions. How long will it take Gaelic culture, traditions and language to overspread an island which contains a considerable minority, something like one-fourth, who inherit neither language, culture nor traditions of the Gaelic type?

The application to ourselves is obvious. Canada has English traditions, culture and language always being renewed and almost daily: Scotch culture, etc., in the same way. Irish in the same way. These create little abstract to nationality: but when we add French culture, traditions and language, the difficulties are multiplied; and when we add the influence of the great neighbour to our south with whom we mix and who mixes with us daily and speaking the same language yet is conscious of ideals, traditions and culture considerably discrepant both from each other and from ours, the problem of a distinct nationality for Canadians becomes sufficiently thorny.

There remains the British practice of tolerance, as a basis for a Canadian nationality and the Griffith ideal of tolerance. Can the love of a common birthplace, backed up and buttressed by a long established never-failing rigid-enforced tolerance of divergency of race, language, traditions and culture, sustain in this country a Canadian "nationality," and make up for the lack of homogeneity in the matter of culture, traditions, language and race?

In that direction appears to be the only solution of the problem open to Canadians. Nationality of this sort is at least a lawful ambition: much more lawful than the ambition for a Canadian "literature." Literature is avowedly and essentially cosmopolitan, of all races, languages and traditions, and cannot be chained in the Procrustes' bed of nationality. If we can develop a nationality it must be on the model of Britain's practice and Griffith's. When that day comes we shall be able to say of Canadianism somewhat the same thing, but not precisely the same, as the Athenian essayist of Hellenism: "Hellenism," he said, "is not a matter of race but of intelligence." "Canadianism," we shall say, "is not a matter of race but of principles."

*How charming is divine philosophy.*

The land o' cakes and philosophy gave us Jean, and sent with her its ideals of sound scholarship, and a penchant for tea! Her slim shoulders have always carried the maximum load of college activities, with special emphasis on "The Varsity," and the Classical Association. Although her prevailing mood is thoughtful, the sunshine of her land of adoption smiles in her disposition.

C. E. HELEN ANDERSON

*Come and trip it as ye go,  
On the light fantastic toe.*

From Oakwood Collegiate "Andy" came to College in the class of 2T4 and danced her way through four years of the General Course. Fun and friends and laughter will follow her wherever she may go!

DORIS ARMITAGE

*Watch her half-smiling lips, and downcast look.*

From Parkdale Doris wended her way. In English and History, her destiny lay. There she has dalled with Milton and Chaucer. 'Till essays and theses now never shock her. Sparkling blue eyes, bright piquant face. A jaunty step, these all give her grace. 'Mid sorrows or joys, ever calm; full of fun, Always ready for work, "Our very best chum."

MURIEL L. ASMAN

*Thou hast so much of wit, and mirth, and spleen about thee,  
That there's no living with thee or without thee.*

Came from B.S.S. to take a course in Moderns and in a bit of everything else. Studied enough to win an old Scholarship. Has an obsession for basketball, through which she acquired a senior "T" early in life. Her senior year found her on W.C.A. and Class Executives and on Women's Athletic Directorate.

MARY C. W. BUFFAM

*One crowded hour of glorious life.*

The charms of Math. and Physics enticed Mary "Charles Wesley" to "94" from Perth-on-Tay. True to her native bent she has since been searching for fundamentals. Spare moments were occupied with the S.C.A., skating, catching trains and innumerable meetings. Now grave, now gay, she has given herself to the work in hand and "her candle goeth not out at night." Could she but discover the secret of perpetual motion all her problems would be solved.

She would not do  
In friendship's name.*

Fate was kind to Emma—laughing eyes, a most amiable disposition, merry yet serious, frank yet sympathetic, and "constant as the stars;" a heart over-flowing with generosity, a sense of humour—while an unswerving faith in "Moderns" has rewarded her a worthy standing each year. Briefly—a genuine friend.

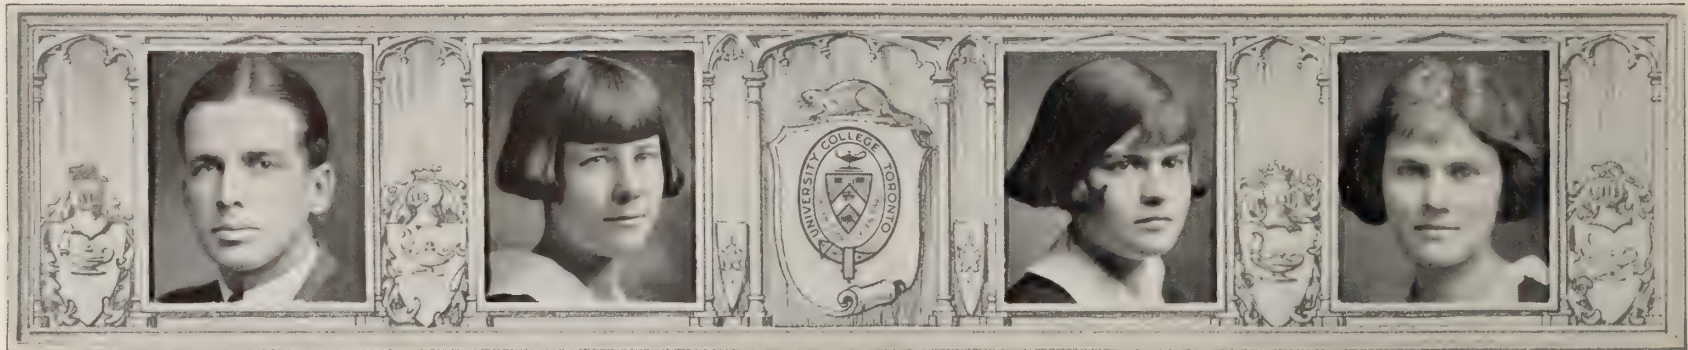

MARGARET BENNETT COLWILL

Eloquent eyes and an engaging disposition have won for "Marg" innumerable friends. Never too serious, her concern is rather the brightening of to-day than the task of to-morrow. Dawned at Arthur, descended on Varsity, dallied a little and now departs. May dip into business.

I'd refuse to hark,  
I'd be snoring, snoring.*

Ernie made his first appearance in Belfast, Ireland, but at an early age exchanged the Shamrock for the Maple Leaf. During the past four years he has observed much and talked little. He is fond of stars (astronomically, we mean). This may be the reason he stays out so late.

MARGARET S. EDWARDS

*She can be as wise as we  
And wiser when she wishes.*

The Thousand Islands have a charm for Margaret which four years at Varsity have only intensified—she loves to take the odd trip home. With a mind peculiarly her own, she is indifferent toward trivial things but may be relied on in matters of importance. Her attitude is one of delightful reserve; her moods contemplative, genial, or gay.

OLIVE EILEEN ELLIS

*All that the world's coarse thumb and finger  
failed to plumb,  
So passed in making up her main account,

*What a vain thing is speech,  
And I so happy in my rosate thoughts.*

Tea, and a volume of poetry; long winter walks; odd scraps of writing; the tinkle of a mandolin down the hall—what trivial, yet vivid reminders of the quiet manner, masking a keen wit and a neat gift of words!

CAROLINE WETHERALD GRANT

*What'ere I think,  
Whene'er I think it, I must speak.*

Caroline came from St. Margaret's College to U.C. in '19. The Players' Guild, the Settlement and W.U.A. executive meetings all proved congenial interests. The dusty shelves of a mysterious book-dealer, or the satisfaction of playing eighteen holes of a morning!!

Moderns at U.C. became the means.  
Gathers scholarships as easily as she strums ditties and dabbles in dramatics and gymnastics.

Foibles: Handball and Piquet.

EMMA ALICE HIGGINS

*Search out and tell me why, when, where, and how it all began.*

Golden hair, expressive eyes, acquisitiveness of knowledge and an elusive intangibility are characteristic of Innis, who came from Markham to enter Biology and Medicine—and became "Medical Adviser" of "94". Hers are the qualities of frankness and sympathy, capability and gentleness, impulse and deliberation and, above all, of a perfect friend.

Bringing her smile and ukelele.  
She played, she danced, she studied, too,  
Each day the hours seemed all too few  
At U. of T.

Along she came and troubles flew.  
We love her with all might and main  
And hope to have her back again  
At O.C.E.

MARY LIVINGSTONE MCCREEDY

*Find out the meaning of her mind who can.*

With interests extending well beyond English and History to discussion groups, the "Lit", Labour Temple meetings, the S.C.M., Varsity rink, and dancing—that's Mary to the casual acquaintance. But when you really know her!!!—Now she distracts you in lectures with her original remarks, now she shares with you her deepest thoughts, and again she amuses you with her insuppressible tendency to gossip. To those who know her Mary spells "infinite variety."

FLORA K. MCCREARY

*I have bought  
Golden opinions from all sorts of people.*

Know all men by these presents that Flora is charged with tarrying at U.C. and "94" en route to Osgoode. During the aforesaid time she devoted her time to astronomical aspirations, Hart House Hilarities, and the evolution of Economics.

in spite of English and History, S.C.M., Pre-  
sidency of the Lit., "The Varsity", Convoca-  
tion Choir, and what not, is always ready for  
a rambling hike or a leisurely chat at tea.

HELEN JEAN McGREGOR

*Humility, that low, sweet root,  
From which all heavenly virtues shoot.*  
Her Scottish wit is sure to please.  
Her cheerfulness supreme;  
When other occupations fail,  
Jean's quite content to dream.  
In teaching did she spend her time.  
But now she's here at college,  
Enjoying all the musicales  
While still pursuing knowledge.

Catharine is a Maratimer and proud of it. From Trafalgar and Havergal she entered Moderns; brought to her work conscientious endeavor, and to college activities, enthusiasm. Her absolute sincerity, her ready sympathy, and her capacity for getting the biggest amount of fun out of life make Catherine the best of good comrades.

PERCY MATENKO

GARETH EDWARD MAYBEE

*Let not propriety, nor prejudice,  
Nor the precepts of jealous Age deny  
What sense so incontestably affirms.*

"Garry" preserves the wisdom of a Solomon beneath a demeanour so sphinx-like that even his Egyptian counterpart would find it difficult of emulation. There is a seat reserved for him in Heaven next to the Three Wise Men.

HAROLD MEEN

*He needs no introduction. He speaks for himself.*

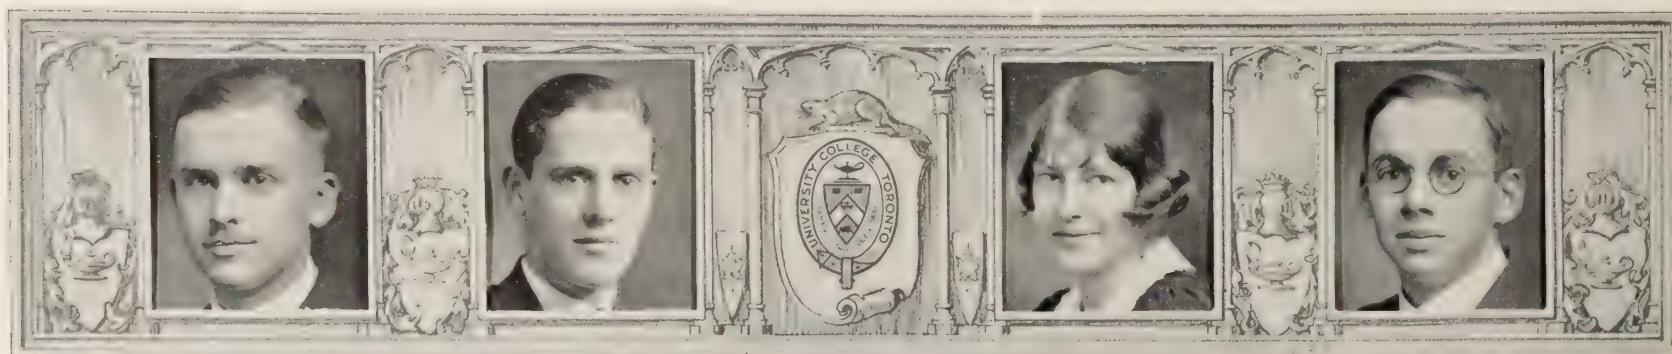

Harold came to college 'way back in the sixties, but thanks to a series of ailments including a course in theology, diphtheria, erysipelas and appendicitis, is with us yet. MARIAN JEAN O'BRIAN

*Why worry, to-morrow brings another day.*

Marian

as a midsummer flower  
With solace and gladness,  
Much mirth and no madness,  
All good and no badness;  
So joyously, maidenly, womanly  
Her demeaning in everything  
Far, far passing that I can indite  
Or suffice to write of Marian.

E. G. PAIKES

BEATRICE McELROY REID

*Believing only as her feelings do direct, this maiden proves her own philosophy.*

Carefully unconventional,  
Never retrogressional,  
Always conversational,  
Rather intellectual,  
Also analytical,  
Not to mention critical;  
It is most regrettable  
Her chit fault's unmentionable.

HELEN EVANGELINE ROBBINS

*What will they do when I am gone?*

Her linguistic ability, her appreciation of "the French point of view," and an inexhaustible memory, have brought her success in Moderns. Happiest among her friends, her ever-readiness to help a friend in need betrays a disposition peculiarly her gift. Her practical nature finds ample scope to exercise itself at Queen's Hall, for "she makes such good tea."

H. G. ROTTENBURG

From Branksome Hall she made her way To Varsity, for work and play.

MABEL LETA SECORD

*And the little Imp of Laughter,  
Laughs in the soul of me.*

Pert?—Well, it's not her intention.  
Quiet? She shows no pretension.  
As a friend she is true and does all one can do,  
And of this she never makes mention.

Clever? With honours she always ranks high.  
Witty? She'll not let a chance go by.  
Of her moods and her whims, her dances and swims,

We could say more of Mabel but space will deny.

ALICE MURIEL BARBARA SMITH

*Native's my weapon, but I'm too discreet  
To run amuck and tilt at all I meet.*

A dash of wit, a little whimsicality and ambition too, add to this an equal love of a good story and an argument, besides a decided weakness for gift shop jewellery, etchings and J. M. Barrie, and you have Smithy. Favorite hobbies golf and "The Fool."

EILEEN GRENVILLE SMITH

*The truest greatness lies in being kind,  
The truest wisdom, in a happy mind.*

Born in Nottingham, England, Jan. 3, 1902.

Is she clever?—Who can tell?  
Can she dance? Yes, very well.  
Is she jolly? Full of fun.  
On time for a "Nine-o'clock?"—Watch her run!

Kind and thoughtful, friendly, too;  
A damsel sweet, and a comrade true.

HELEN MARR SMITH

*A minded sophistication and demureness.*

The lady is clever,  
And yet by endeavour  
She hides it beneath a disguise;  
Of feminine guile  
She knows every style,  
You can tell it to look in her eyes.  
(She is frequently sensible, too!)

MARGARETTA SPENCE

*Ah! then and there was hurrying to and fro!*

Ask me the secret of her charm, and I  
answer "character." Demand of me wherein  
her wisdom lies—I give you "Joy of Life."  
To her are work and play just sister and  
brother—she loves the one, but flirts with the  
other. Of such fibre does the world weave a  
lasting influence.

Forth to the stadium and choicest shows  
This maid from Ridgetown gaily goes.  
She's fond of music, fond of books,  
Of hills and valleys and babbling brooks.

Others, "Blest are the holidays to come!"  
For her, combining both, on future day  
The still sweet music of "Admitto te!"

JAS. ALEXANDER MILLER STEWART

to set the table on a roar.*

Though domiciled in Buffalo, this cheerful  
culmination of Scotch and Irish forbears, was  
born and still remains a staunch Canuck. Two  
years as Sporting Editor of "The Varsity" have  
proven his outstanding literary ability and

a buoyant disposition have made "Miller" wel-  
come everywhere. The lad has journalistic  
and literary aspirations.

THOMAS ARCHIBALD STONE

Ye Gods how he did burn it.*

Keith floated in on the tide in Hamilton, April 19th, 1901. Has had a stormy passage ever since. Interested in all University activities, especially the Camera Club and the Hall Committee. Hobby, midnight tea-fights. His willingness to work for others has won him an enviable reputation at Varsity.

F. ELVENA WALKER

*She has wit and song and sense,  
Mirth and sport and eloquence.*

That is to say, being interpreted, she warbled with the Glee Club, wiggled with the swimming club, and waggled her tongue eloquently, wittily, sensibly and mirthfully as a member of Third Year Executive and, eke, wherever Economics was discussed. A passable interest in Household Science was also displayed.

GEORGINA MAE WALLACE

*A rogue with a merry tongue,  
Yet kindly withal.*

Bright and happy by nature, in sheer verbal wit and felicity she is unsurpassed. Her animated assertions and merry laughter give to those who know her a sense of supreme delight and immense relief. Though a bit of a Scot in her tardy appreciation of a jest it is hers to tell a witty tale to perfection.

ALICE E. WALLS

JESSIE L. WARREN

*A little learning scattered o'er,  
A frolic of four years or more,  
Then presto, change! and you create

She decides regularly to become dignified and as regularly bobs again. She has bright ideas—we all do—but Jessie works hers out. As for exams—well, she gets the greatest possible result from the least possible effort.

MARGUERITE AMELIA WEIR

*Amiable, yet full of fight.*

There you have her; loyal to her friends (Heaven help her enemies); delighting in literature, music, theatre, men and rugby; worst vice, rooting; highest ambition, to see the world; pet aversion, matrimony; proudest achievement, founder of women's tuckshop; officially, president 2T4 U.C. senior women.

"Weiry" they call her.  
What's in a name?  
Weary? Never!  
She's always game.

KATHERINE BARWICK WELLS

*Her pen's her tongue and faithfully doth serve her.*

If she says she will, she will,  
And there's an end on it,  
Whate'er the task may be,  
'Tis done, depend on it.  
Plays, costumes, teas, "Lit."  
Or "Varsity," she'll do her bit,  
And loves a good time too!  
Oh yes, we think she'll do!

*But I have found our thoughts take wildest flight  
Even at the moment when they should array

English and History is by no means Grace's only concern. She's interested in hockey, in the "Lit," and thinks the S.C.M. the best thing in College. Boston, London and New Jersey in her early years account for her accent, one of her distinguishing characteristics. She's the best, though sometimes the most, determined of friends.

*Of sober mien and stately gait,

Greeted Dartmouth, N.S., Dec. 28, 1900. Left U.T.S. for Varsity. Experimented one year in business, preferred U. of T. and Wycliffe. Secretary Tennis Club, '24. Divides his attention between Tennis and Yukon. With the traditional instinct of those who come out of the East "He weighs his words."

Born Dec. 13, 1902; has lived since in Canada. Early learning at Stratford; honour matric. from U.T.S., where he played baseball and handball. Commerce and Finance, 1920. Enlivened work by maintaining baseball, achieving squash racquets, and rejoicing on the traps. His departure leaves a great silence and a horrid gap.

This spirit of energy which presides over Evelyn has been the direct cause of her interesting college career. Imbued with much enthusiasm and a great executive ability, Evelyn has made her pet hobby the class of '24. ## Class History of 2T4, University College

---

We are the Seniors of the University! Four years of the life "just meant to give thy soul its bent, try thee and turn thee forth sufficiently impressed" have been our privilege. That we have given our soul its proper "bent" is our hope; that we have been deeply impressed is our declaration; but that we have been sorely tried, in many and various ways, is our firm conviction.

Our year history is the usual history of college students. When we entered Varsity in the autumn of 1920 we had a large year; strangely enough, in the next year it was smaller; in 1922 it was smaller still, and this year beheld the enrolment of a select and able band of seniors who had emerged safely from multitudinous examinations, nine-o'clocks, Hart House dances, rugby and hockey matches, banquets and class parties.

The senior year has a further place in history, in that it was chiefly instrumental in bringing about the system of separate executives for the men and the women. This division of the executive function has led to a closer union of the men with the men and the women with the women, without in any way loosening that bond which must exist always between members of a class.

An innovation in University College this year is the programme of college dances, the purpose of which is to create a feeling of unity between the four years which has been lacking hitherto. The first dance of this kind was under the auspices of the senior year and its success leaves no doubt that these gatherings fill a long-felt need.

In sports, we, like Barkis, are always "willin'," and both men and women have been well represented on 'Varsity and interfaculty teams. A greater interest in debating and in the drama has been exhibited lately in the university and with just pride we recall the names of outstanding orators and playwrights who, in the Debating Union and in the U.C. Players' Guild, have brought honour to the year.

2T4 has shown its merits in the sphere of undergraduate life. Now, as the graduating class, it goes forth into a very different unacademic atmosphere. There again, it is to be hoped (although "the oracles are dumb") to be an agent of progress as befits the traditions of the University of Toronto.

# University College Literary and Athletic Society

---

With an enthusiastic display of interest in every phase of college activity, this year may well be considered a great success by the University College Literary and Athletic Society. The new Society, formed in 1922, has amply fulfilled all that was expected of it at the time of the reorganization. Not only have the old traditions of the important place of U.C. in University life been well sustained, but new activities, suited to the present type of undergraduate student organization, have been introduced which have set a high standard for all coming years.

The development of a healthy college spirit among all men in all years has been the chief point of interest during the past twelve months, the system of separate executives which has been used for the first time being largely responsible for this. All of the men's activities have been brought into closer contact with the "Lit" and in cases where joint action has been necessary for various year functions the combined men's and women's executives have been able to work together as under the old system. The greater unity evidenced among the men of the college is traceable to the more direct interest called forth by the fact that all of the purely male undergraduates' activities are handled by their own executives. An innovation of this year also has been the initiation of freshmen of the college under the supervision of this Society. The freshmen were made to feel their places in the spirit of the college by a large "Smoker," and Supper in Hart House afterwards.

The Literary meetings of the Society have been marked by the general discussions after debates in which all members joined and which greatly enlivened the proceedings. The executive has made it a policy to conduct a minimum of routine business at the general meetings. In the Inter-College Debating Union, Osgoode Hall were the victors in the first debate which was well contested by U.C. The interyear debates were of an extremely high order and were held on subjects which were of great interest to the College. An address of great interest was that delivered by the Honorary President of the Society, who related his personal experiences in the Japanese earthquake. All of the meetings have closed with a social hour in the Great Hall in which community singing was a prominent feature of the programme. There have been three publications of the "Once-In-A-While" during the year and thus the students have been kept in close touch with all college activities.

In university athletics the college has certainly done her share as is evidenced by the U.C. representation on all 'Varsity teams.

The showing made by the first year augurs well for the next few years. In interfaculty competition we have again had a championship water polo and swimming team, indeed a polo team that went through a strenuous schedule without a defeat. In the interfaculty rugby series, the Junior U.C. team distinguished itself by reaching the semi-finals, and the college soccer team also reached the semi-finals, going down to defeat after a titanic battle with S.P.S. It is indeed fitting that the showing of our track team be recognized as a great achievement, as it finished second in the interfaculty track meet. A notable feat was accomplished by one of our track-men who established a new Canadian record in the pole-vault. The college has also been well represented in hockey with two teams, and our indoor baseball and basketball teams are winning with a consistent regularity which gives us at the present time hopes for more championships. An athletic dinner under the auspices of the alumni of the college is being planned for this year which will undoubtedly prove a fitting climax to a very successful year for our college on the gridiron, track, and in the tank.

Our social functions were crowned with the highly successful "Arts Ball," which was again held in Hart House. Under the "Lit" a programme of four college dances has been held, each year executive being responsible for one. These dances have fulfilled the highest expectations of the executive, uniting the social functions of the college as a whole in a way that class parties of former years did not do. A faculty night, with the title of "The U.C. Follies," has been arranged in Hart House. This marks an innovation in the history of University College events and it is hoped that it will become an annual affair.

The prospects for the future are very bright. With the departure of the University administration offices to the new building the hopes that have been held out for some years that University College men would have a common room are about to be realized. Recognizing the important place of the society in the life of the college the authorities are planning to give the "Lit" more commodious offices and committee rooms. Considering the place attained by U.C. in athletics, the growing interest in the literary programme, the success of social functions and the re-awakened college spirit displayed during the past year, the retiring executive feels assured that from now on there is no doubt but that University College will hold her place in the forefront of university activities.

## University College Women's Literary Society

"The knowledge which a man can use is the only real knowledge, the only knowledge which has life and growth in it, and converts itself into practical power." And thus it was, that, having once acknowledged the varied needs of the avowedly cosmopolitan undergraduate, the University College Women's Literary Society seriously set itself to gratify one phase of this many sided character.

Above all, the society wished to provide University women with an opportunity to practise public speaking, and undoubtedly the natural medium for this is the debate. Accordingly several wordy battles have raged under the auspices of the Women's "Lit" this college year. As the number of debaters seldom exceeded four, it was generally possible to assign to so small a group the type of argument best suited to the individual's forensic gifts. The result was a generous range of subjects—philosophical, practical and imaginative.

In one of the first meetings of the year, partly to forestall any

possible obsession regarding the "Lit's" highbrowism, and partly to encourage the love of fun so often seriously jeopardized in the first months at college, a wide selection of reading, representing our foremost humorists, was presented. This policy, expanded to embrace more serious works, was constructive, insofar as it might prove of real assistance in a wise choice of reading and was pursued in successive meetings. Within a few months' time, the society had presented for discussion the works of Drummond, Louis Hémon, Kipling, Gilbert and Sullivan, Irwin, Violet Jacobs, Charles Murray and Beerbohm.

It has always been the "Lit's" object to definitely promote a wider literary knowledge and with that end in view it has endeavoured to secure the active co-operation of its members. Many of the very best papers delivered before the society were prepared by undergraduate members, with an eagerness and ability which augurs well for their future success in life's forum.

## The Modern Language Club

---

The Modern Language Club of University College exists for the purpose of stimulating interest in modern languages and their literature. Programmes are arranged and addresses are given during the year in French, German, Spanish, Italian, and English; and to everyone who is at all interested in any or all of these languages, the Club extends a cordial welcome.

At the first meeting of the Club this year, Professor deChamp gave a charming address on Provencal Poetry. Another speaker of the year was Professor Cameron, who illustrated an unusually fine discourse on Cathedral Architecture by means of lantern slides, showing the architectural beauties of Notre Dame de Paris.

L'Homme Sensible, a play written by Mr. L. A. MacKay, a graduate of last year, was produced in Hart House Theatre on November 27. Played by an able cast, it attracted widespread attention, and proved exceedingly interesting.

## The Women's Undergraduate Association of University College

The Women's Undergraduate Association is the self-government organization of University College, and its membership includes every woman undergraduate registered in the College. The Executive, the Women's Undergraduate Council, consists of an Honorary President (a member of the Faculty or wife of a member), a President and a Vice-President (members of the Fourth Year), a Secretary and a Treasurer (member of the Third Year), the Presidents of each year and of the Women's Societies, the Head Girl of Queen's Hall and a representative of the U.C. Women's residences.

The term commenced with Miss Josephine Struthers as President. But, owing to unavoidable circumstances, Miss Struthers was obliged to resign. She was ably succeeded by Miss Margaret Thomas.

This is the first year that the President of each year has become automatically a member of the Women's Undergraduate Council. This direct linking of the year executives with the W.U.A. has

proved an advantage over the former system of separate year representatives.

The duties of the Association include the direction of Athletics. The Vice-President of the W.U.A. is Director of Athletics and has a staff of curators to assist her. This year, a special effort has been made to encourage participation in Athletics among the women of the College. Inter-year sports have been introduced and have had enthusiastic support.

The W.U.A. is particularly concerned with the reception of the first year. During the two days of registration an "Information Bureau" is operated for the benefit of the newcomer. Initiations are also under the supervision of the W.U.A. The social functions of the year included an informal party for the Freshies, held the first week of the term, and the Annual Autumn Tea at which the undergraduates were given an opportunity to meet each other and the wives of the Faculty.

"These I have loved" . . . . .

Wholesome fun;  
The pleasant glow that comes from duties done;  
Gay chatter over friendly cups of tea,  
And wondrous fortunes told; and long, free  
Hikes through glorious autumn days;  
Discussions pro and con of essays, dances, plays;  
The pleasant clang of skates, and the soft white  
Of sweaters; house dances, with the bright

Swish of dresses; half-stifled laughter  
O'er mischief planned, and sounds of scurry after;  
The joyous rush for 'phone and mail; the morning sound  
Of 'larms each quarter hour; the circle round  
The friendly fire, where happy comrades find  
Friendship and loyalty . . . .

All these to mind  
In future years I'll bring: so may I gaze  
Once more on memories of college days.

The days of college life are drawing to a close. You have realized that a large part of college education is obtained by contact with fellow-students and you have a feeling of great sorrow when you remember that the friends of four years must soon separate. I hope that as many of you as possibly can will take advantage of the class re-unions and in that way keep in touch with our University, watching its great development and meeting and knowing as many as possible of the Alumni of whom you form a part. We cannot but feel the utmost affection for our University, which has done so much for us, and for which we all as graduates would work with ever increasing zeal. The knowledge of self-government which you have had at college will help you to realize the self-government that is our right in this country, and having known the advantages of organization, you will use that knowledge for the best interests of our country. You have the capacity, the training, and the will to think.

Almost all the Seniors have been in residence for four years. You will miss your college home and we say goodbye to you with the greatest regret, wishing you very happy and successful future years.

I cannot give you who are graduating any better message than the one with which Canon Cody concluded his address on the occasion of the dinner which was given in honour of the winners of the Nobel Prize:—"We have obtained by inheritance and by achievement one of the greatest Universities of the World, daunted by nothing, big with hope, wide in achievement. Adorn it!"

Queen's Hall! Follow an intriguing path which wanders vagrantly from the dusty highway of sober Consistency and staid Matter-of-Factness. Peep warily into the fantastic thicket which rings with sudden peals of laughter at each new elfish prank. Ponder for an instant in the cool shadow where an incongruous brownie racks his small brain for one solemn moment in search of the baffling whence and why. Do not neglect to linger on the sacred spot where the troop bow in a flood of sympathy for the grief of one, until mutual understanding and trust sheds its mellow glow over every heart.

Note, too, just one spot where the brown dust of the Business of Life has not been carried away by the most frolicsome breeze, for the pixies dwell but a short space in this their chosen abode—the happiest of them for only four years—and they must keep even here a bit of the dust of the broad highway beyond, to remind them that it is out there that they are to take up their journey after their sojourn in this delightful spot.

CHANCELLOR R. P. BOWLES

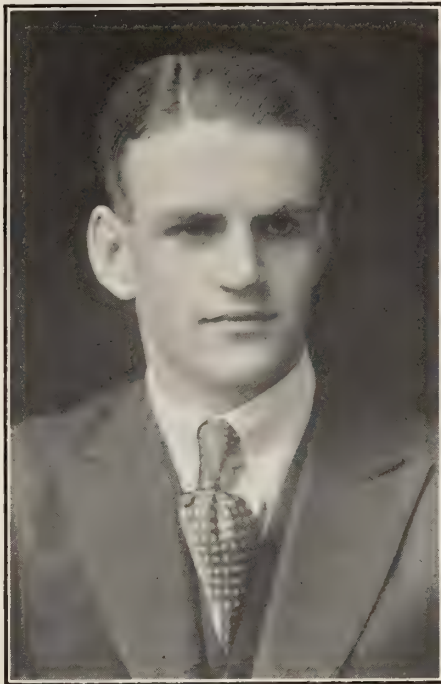

---

The path of Canadian development is beset with distinctive problems. They have their source in racial and geographic facts—facts which will persist and breed new problems for new generations. By no constitutional form or master stroke of political sagacity can they be dismissed. Persistent and indigenous problems have at least this virtue—they take no one by surprise. They are expected and are never altogether new. In the course of time the nation develops a special wisdom in dealing with them. It may be regarded as one of the first duties of all citizens to understand the history of their own country. It is unpardonable that the students of our Canadian Universities should be without understanding of the principles which have found expression in the constitutional history of the Dominion and in the attitude of political leaders to the persistent problems of Canadian unity. The ignorance which scoffs at the seriousness of our problems or seeks to solve them by a policy of studied neglect, is utterly out of place. I covet for the graduates of our universities such knowledge of the past as will give present wisdom. The disposition to trust the provinces and sections of the Dominion other than one's own, to understand and see the values of those who differ in language and religion, to be perfectly fair-minded in interpreting class and occupational demands and ideals—these should be special characteristics of university men and women. One might despair of his country if its educated citizens showed no superiority to deplorable racial and class prejudices.

This son first shone forth in Waterdown, Ont. July 16, 1900. Four years at W.H.S. and one year at Hamilton C.I. turned out the finished product in 1919. Since 1920 has been successfully grappling with Mathematics and Physics at Vic.

Future: College of Education and moulding the future generation.

HELEN G. AUGUSTINE

*Hence, loathed Melancholy!*

Helen came from Port Colborne with a famous giggle, and buckling down to a little work,—behold her a Bachelor of nineteen summers! She is a lover of music and sport, has warbled with the Choral Club, frequented the tennis courts, and patronized "Little Vic." Beneath a shy exterior she hides a capacity for clear thinking and independent acting.

WILLIAM O. BLUM

*Ah, why should life all labor be.*

Our hero made his debut in life at Owen Sound early in the century. Since then he has been playing the game of life consistently, and enjoying it. Never over-works, but gets there just the same. Nothing worries Bill, not even lectures. A good sport and a friend to all.

Immediate objective:—France. Later:—business on a large scale.

E. JOYCE BOYLE

*This world . . . means intensely and means  
good;  
To find its meaning is my meat and drink.*

Joyce came from Oakwood Collegiate with a scholarship in Mathematics. She showed her usual propensity for going in opposite directions by entering English and History. Her "satisfiable curiosities" led her into many discussion groups, both organized and unorganized, where she found new ideas by the score and a host of friends.

MISS MABEL CAMPBELL

*Begone, my cares, I give you to the winds.*

Reserved, not cold, merry but not boisterous, eyes that sparkle with life, a hand ever outstretched to her friends for whom she found time notwithstanding her Math. and Physics.

RUTH ADELAIDE CARTER

*But she was wild and sweet and witty;  
Let's not say dull things about her.*

# VICTORIA COLLEGE

WILLIAM CLARKE

*The play's the thing.*

Born near the Lindsay Opera House in 1902, he has been acting, reading, or writing drama ever since. Vice-president and male lead of the Victoria Dramatic Society, and President of the senior year. We predict a brilliant future for him on the stage, and anticipate with pleasure seeing him die many times in the last act of Hamlet.

LILLIAN AMELIA COCKS

*Ten thousand broken lights and shapes, yet glimpses of the true.*

After spasms of studiousness at Grimsby and Hamilton, Lillian entered Moderns. Quite content to let others hail the rising sun, yet found time to indulge her love of outdoor life, of tennis and baseball, expending her surplus energy in French and German. Always brimful of enthusiasm, and the jolliest of companions.

JOHN POTTER COOKE

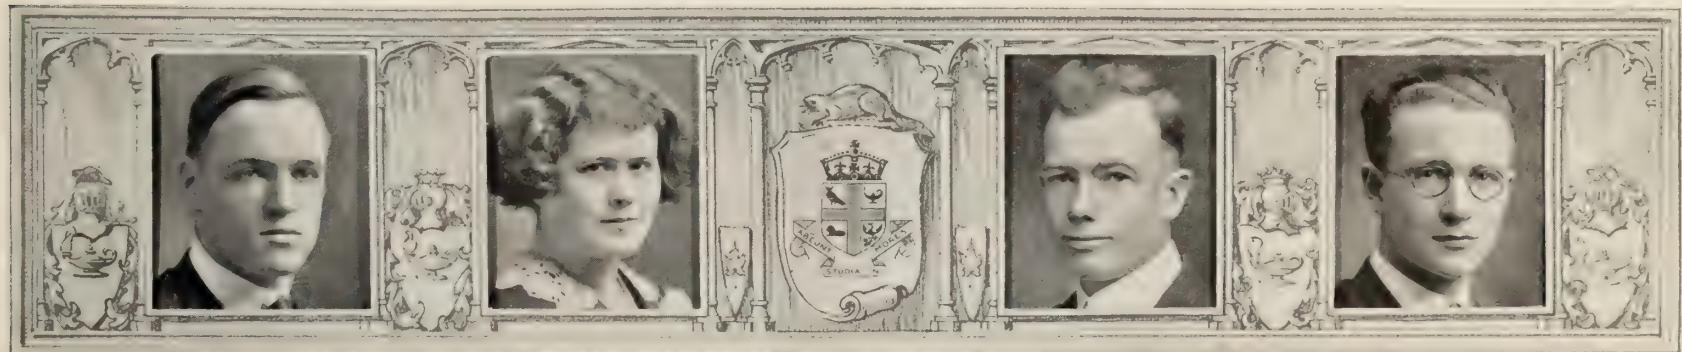

*Here's to the man that knows how to growl - and won't.*

Born in England he came to Canada in 1904. He settled on a farm near Fullarton; ambition led him to Mitchell High School; he felt the need of further education; so came to Vic. in '20. He was quite a studious fellow except at night.

HERBERT NEWELL COUCH

*A sunny temper gilds the edges of life's darkest cloud.*

A son of the Parsonage—usual itineracy. Six schools acknowledge responsibility for early training. Graduated Ottawa C.I., 1919, with gold medal and a host of others; U.T.S., 1920, with Governor-General's medal. Entered Vic. Classics with two scholarships. Endowed with artistic temperament thus far manifested in cartooning and sign painting. Sunny temper predominates.

RALPH BRONSON COWAN

*Our house is hell but thou a merry devil  
Did'st rob it of some . . . tediousness.*

Has never divulged why he came to college. Possibly to become naughtical by living with a seafaring roommate. Students refer to him instead of "Who's Who." Has the original Northcliffian "nose for news." Aspires to edit "The Daily Flail." Motto:—"Per ardua ad astrakan."

MURIEL CULHAM

*And so she came into the land of faerie  
Where no one gets old or godly or grave  
Where no one gets old and bitter of tongue  
And she is still there, busied with a dance.*

"Snooks" transferred her activities from Humberside Collegiate to Vic. in '20.

Aversions—Dissecting rabbits; 9 o'clock lectures; Vic. receptions.

Diversions—Writing verses; joy-riding; any brand of piano.

Her future—You never can tell!

ROBERT CHARLES RUSSELL CUMMINGS

κρίνω δ' ἄφθονον ὄλβον

Bob's interests are many and startlingly varied. He has a mathematical and scientific bent, yet is a staunch exponent of a liberal education. He is a devotee of tennis, and has a "flair" for architecture, bungalows a specialty. We wonder why!!! As President of a flourishing Classical Association he has revealed a fund of executive ability.

A real "glad hand" artist—Good old Bob!

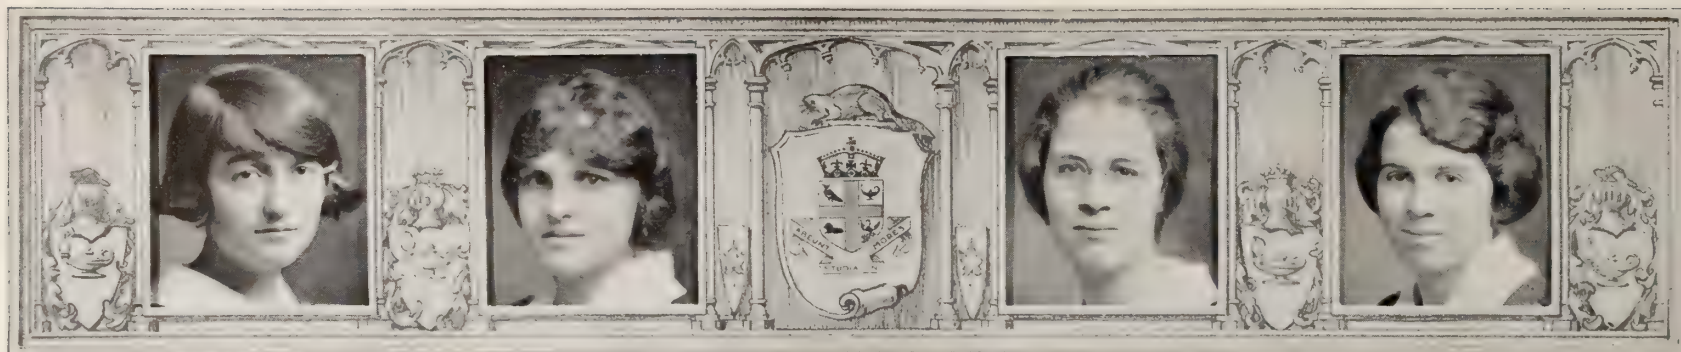

FRANK CUNNINGHAM

*'take him for all in all,  
I shall not look upon his like again.*

In him is a mixture of many dissimilar elements each developed to a remarkable degree, and united to form that something which we like in him. The preponderance of the artistic is often, when least expected, rudely thrust aside for more practical endeavour. By turns he is thoroughly absorbed in pleasure and work. When he works he is pleased with himself. When he plays he is either bored or enamoured. A future of outstanding achievement will be his.

MARSH DAVIDSON

Freshman: "I was ever a fighter."  
 Sophomore: "My thoughts hold mortal strife."  
 Junior: " . . . . . alone  
 She seemed to live, her thoughts her own."  
 Senior: "Now I scarcely dare sleep lest a moment dart by  
 When I know not, nor snatch its blooms as they fly.  
 And life's a lit coal with the wind blowing high  
 Stirring the glow."

KATHLEEN M. DAVIES

*I have a heart with room for every joy.*  
 From the very first day when to college she came  
 And declared it to be "rather jolly."  
 Kathleen has been winning her way up to fame  
 Through study, through sport, and through "folly."  
 Her essays we envy, her tennis we fear,  
 Her studious strains quite appal us—  
 But for Kathleen herself, we declare "she's a dear."  
 For her fun and her friendship enthral us.

MARGARET E. DEPEU

*A quiet mind, a patient mood, and not disdaining any,  
 Not glib, gadding, gaudy, and her faculties are many.*  
 Modest and unassuming, cheerful and generous, is Margaret. Despite a love of fun, and a positive hatred of lads, she is a faithful student to whom "Firsts" in M. & P. come as naturally as exams. We love to see her taste a joke—when she gets its flavor, her jolly bubbling laugh is worth the wait.

MARY EDITH DEPEU

*In her heart is the law of kindness,  
 And she catcheth not the bread of idleness.*  
 Deserting Paris H.S. Mary joined the class of '24 to pursue for four short years the thorny path of Moderns. Persevering as a student and ever ready to help others, she has won for herself many lasting friends who wish her all success when college days are over.

GORDON DOMM

*I have been so great a lover.*  
 These have I loved:  
 Ayton—since 1900.  
 Harriston—at High School.  
 Mount Forest—various reasons.  
 Victoria—'24 especially.  
 A neat room and tidy.  
 A sweet personality—and deportment.  
 Girls—and a girl.  
 Philosophy—in dissertations.  
 Discussions—chiefly pseudo logical.  
 Violin—and persistent practice.  
 But the future is dark.

HERBERT LENNOX DOUGLAS

*He seems to be quiet  
 Yet one never knows.*  
 First saw the daybreak at Cheapside, Ont., early in the century. Received public school education via Methodist Parson's itineracy. Junior Matric. at Humberstone C.L., entering Victoria with class of '23. Then in B. & M. class of '24. Hence will continue in Medicine and be found among its stalwarts. Will make an unassuming but reliable physician.

JEAN B. ELLIOTT

A bit of independent mind.  
 A gracious manner sweet and kind  
 A dash of wit to go with it  
 Which Acta used with Keenessness fit.  
 Of logic she knows every source.  
 Though French and German are her course,  
 And a loyal, true friend she'll ever be,  
 Our wee Scotch lassie, Jean B. E.

KATHLEEN ELIZABETH ELLIOTT

*You shall never take her without her answer,  
 unless you take her without her tongue.*  
 Betty Elliott, New York, 1902, animated by the desire to promote greater friendliness between English-speaking nations came to Vic. and successfully directed her general course between lectures, debating and Literary editor of "Acta."

Ontario Rhodes Scholar for 1924. Has yet found ample leisure for concerts, books, and the perpetual burlings to which he subjects his few afflicted friends.

MARY B. FAWCETT

*She is wise if I can judge of her;  
And fair she is, if that mine eyes be true;  
And true she is, as she hath proved herself.*

Mix ambition, honours and the odd scholarship. Add a measure of playing behind footlights, sifting in a musical voice. Flavour with executive ability and a happy disposition—Result, Mary. Household Science 2T4.

MARJORIE MAXWELL FENWICK

*She charmed us "with smiles and soap."*

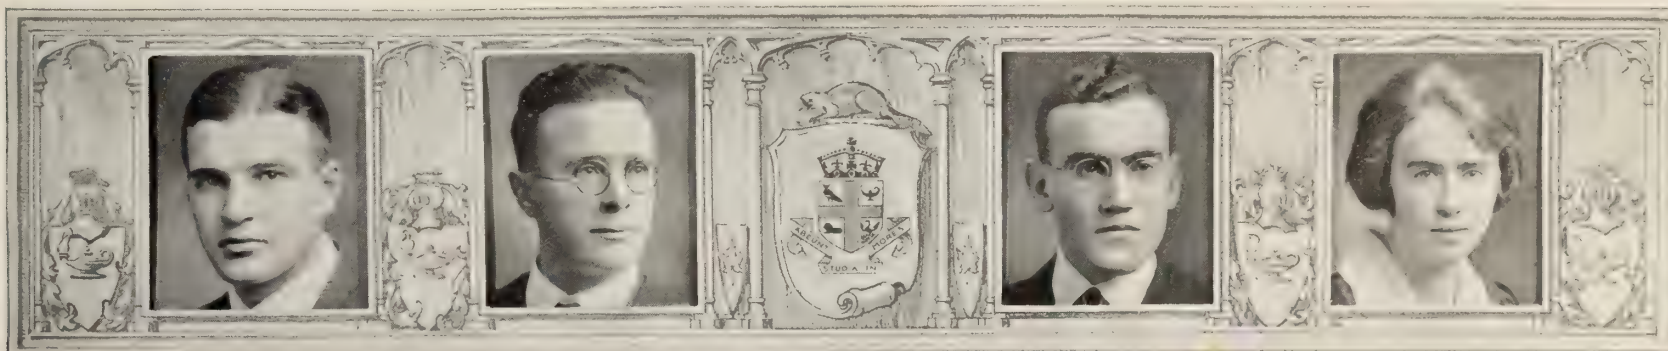

Forever unruffled, Marjorie accomplishes all she undertakes. An extensive training amongst the icebergs of Newfoundland prepared her for Intercollegiate hockey. In fact, almost every form of sport has received her attention. Besides an inclination to T's, "there's mischief in the woman" and a liking for the whimsical in story books.

Future:—Uncertain.

Calmly beneath her earnest face it lies,  
Free from all boldness, meek without a fear,  
Quicker to look than speak its sympathies.*

Home, Listowel, Ontario. Pursues relentlessly, French and German. Loving, understanding, appreciative of the beautiful, pure in thought, loyal to the core, a sweet companion, a true woman is little Agnes.

And away every care and perplexity fling.*

Starting with '23 but preferring better company Margaret stayed home a year in the reviving Aurora atmosphere. She has shown the keenest interest in the Choral Club and the swimming tank not to mention Mormonism and Spiritualism.

For humour and self giving she has Capacity, Capacity.

MENDELSON HARDY HILL

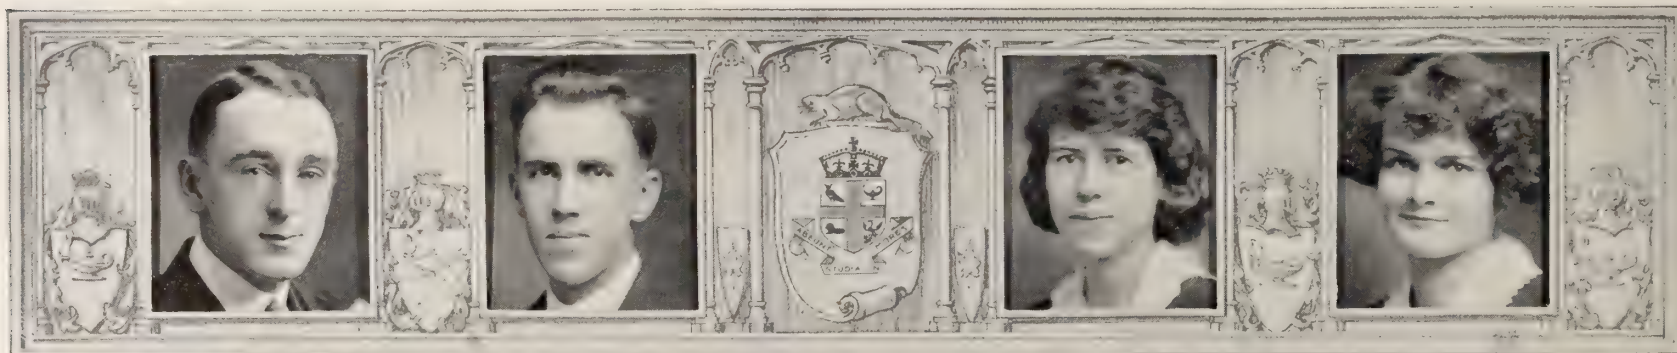

*A milder man ne'er cut a throat nor scuttled  
ship.*

Enlisted as a private in the P.B.I., then joined "Britain's Finest" and saw the world through a porthole. Connoisseur of XXX and S.R.D. He has enjoyed living greatly, drinking life to the lees. Aspires to the Colonial Service where we picture him as coach of the Tanganyika rugby team.

be human gore.*

Found mostly in B. & M. labs., S.C.M. meetings, and on skates. President of S.C.M., holder of Athletic Stick '23-'24. Though a scientist in name she is pre-eminently a "lady of letters." She has achieved her "T," "V"—"B," "H," "T," and now having captured a B.A. is in hot pursuit of an M.D.

HORACE BERTRAM HOPE

*You Cassius has a lean and hungry look,  
Such a man is dangerous.*

Bert was first heard of in June, 1903. Spent his youthful days at Milliken, Ont. Received his High School education at Markham. Enrolled in Honour Science specializing in Chemistry and as side-lines,—music, baseball and re-partee. A man of perplexing virtues.

MAUD MACDONALD HUTCHESON

*And one man in his time plays many parts.*

Maud Hutcheson, educated in Scotland, entered Classics in 1915. In 1917 she 'went back' to stenography, an occupation never since relinquished. She returned in 1922, and while casually running this business-educational campaign, keenly interested and distinguished herself in English and essay writing.

IRENE FORTUNE IRWIN

*Jester fantasies and pilgrim dreams and little  
beggar sighs,  
Bow to your benediction; go their way.*

Youth, joy, and springtime—she is all three incarnate! Dramatic critics call her piquant—faith, she can act! Classical professors term her *puella summo ingenio*—by Jupiter, the child's clever! And we who love her for her own vivacious personality cannot find words adequate to describe her charm.

DORIS BURNS JACKSON

I love coffee, I love tea,  
Dante, Milne, and Carducci,  
Rupert Brooke and Bach and Barrie,  
With all these I love to tarry;  
Raphael, Michael Angelo,  
Cellini, Shaw, and Jean Rousseau,  
Homer Watson, rainy days,  
Tailored suits and Corot's greys;  
Persian rugs, philosophy,  
The "Grange," canoes, theology,  
Del Sarto, Pepys, and chicken dinner -  
Now you and Ruskin know this sinner.

MAUD WALKER JOHNSTON

Future: Actuarial work.

ROBENA MATILDA LITTLE

*Serene and resolute and still  
And calm and self-possessed.*

Home, Dundalk, Ontario. Not as a flashing meteor did Robena land at Vic., but with calm and steadfast tread; and philosophically she has "kept on keeping on." Scorning subterfuge, a lover of the truth, serious yet appreciative of the humorous she has attracted and held the affection of her friends.

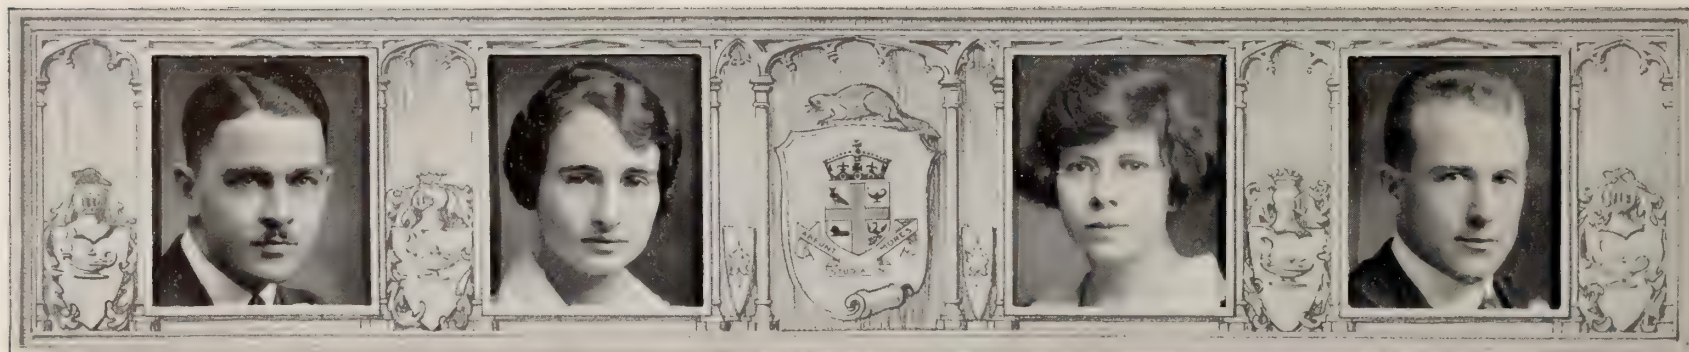

DELO LONGWORTHY

*Let the world slide, let the world go;  
A fig for care and a fig for woe.*

Delo left Regina and invaded our ranks in our sophomore year, melting our reserve in the warmth of her smile. Not content with victory, she continued her conquests with the aid of numerous very effective weapons and at the end of her college course, she holds many hearts in fealty and enjoys always the best that true friendship can afford.

# VICTORIA COLLEGE

DOUGLAS B. MCCOLL

*Quips and cranks and canton toiles.*

"Doug" made his smiling debut in Regina some twenty-three years ago. Since that time he has seen fit to keep his corner of this vale of tears full of cheer. The Bob Committee, Acta Victoriana, his year executive and College S.A.C. have all felt the weight of his serious counsels and the lightness of his airy jests. By virtue of his ready wit and contagious smile he has collected a large circle of enthusiastic friends.

KATE V. MOIR

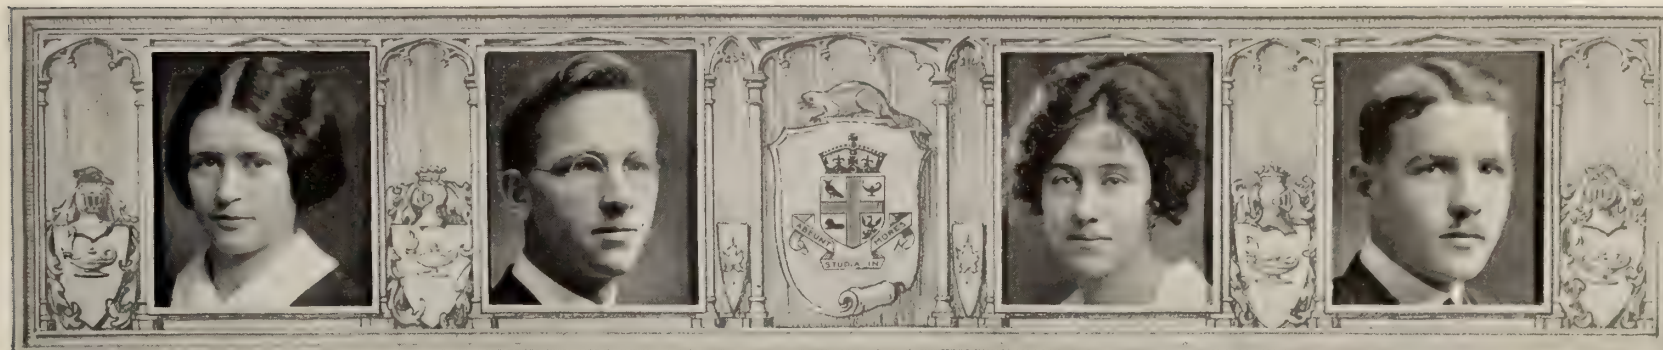

*Of her bright face one glance will trace  
A picture on the brain.*  
Diminutive in stature yet full of amazing capabilities;  
Sweet and gentle in manner, yet the competent head of Annesley Hall;  
Of aspect almost puritanical yet in society a queen;  
Of friends the most true and of class-mates the most gay.

OLIVE MONKMAN

*It is not the passing through these learnings  
that hurts us, but the dwelling and sticking  
about them.*  
Born at Bolton. Graduated from Newmarket High School. Bars for two years service in munitions. Secretary of the Combined Honour Science Club, 1921-22. Class Assistant in her senior years. Despite four years in Biology she still retains her cheerful smile and dimples.

# VICTORIA COLLEGE

MARYON ELSPETH MOODY

*Her stature, comely tall, her gait well graced,  
her wit  
To marvel at, not meddle with, is matchless I admit.*

Maryon came from Winnipeg to enter a very colorful college life. Midnight toils, restless meetings and the odd frivolity are but minor activities. Hockey manager, '23, S.C.M. and president of W.U.A. are her real contributions. Future:—Anything but dull.

HERBERT MOORES

*Heads, its cards; tails, its tennis; stand on edge, its study.*

Herb. began life at Blackhead, Newfoundland; normalled at St. John's; spent the next few years teaching and preaching; one year at Mt. Allison University. In the following year, 1920, he came to Victoria, entering theology. The next year he entered Honour Philosophy, carrying off two scholarships. Future:—A mystery.

LAURA ELIZABETH MUNDY

*Her countenance careless yet pensive, musing yet mirthful, mocking yet tender—  
Versatile?—Oh yes!*

One would never guess from that piquant chin and blue, blue eyes the keen mathematical instinct and wealth of decision which have made her in turn school valedictorian, class pianist, and now efficient business manager of Choral Club.

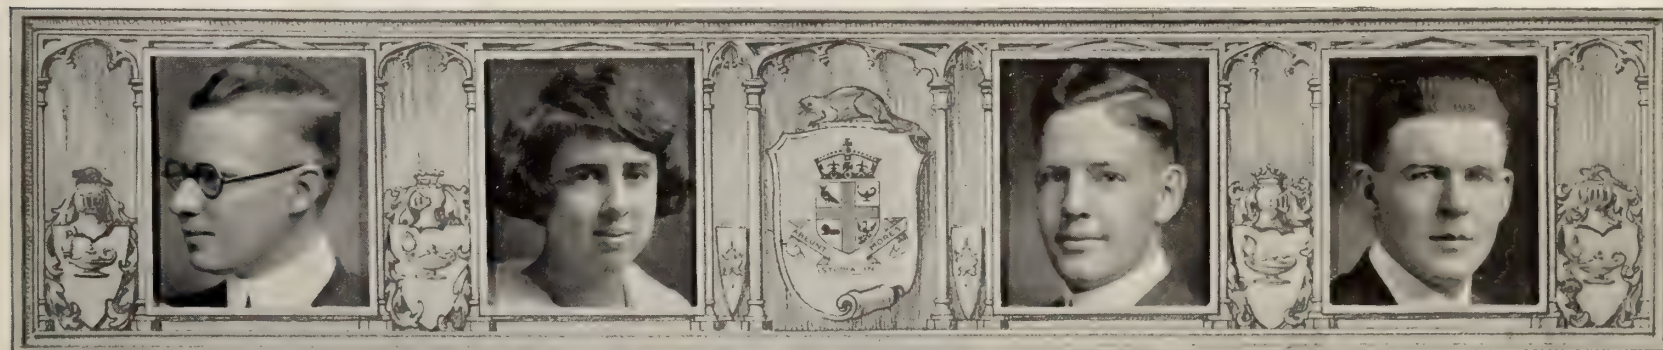

One just must be intrigued by her fearful frankness, the music she delights in, and her infectious chuckle.

Future, of course, in the lap of the gods.

DOUGLAS NOBLE

*Whenever people agree with me I always feel I must be wrong.*

Born, England, 1903. Owen's School, Islington, then Canada. In 1920 drifted into B. and M. where he has distinguished himself by his technique, and given satisfactory proof that least done soonest mended. Has found time for "literature, music, and the drama." Apparent future, a doctor, having himself an incurable disease of Oscar Wildeanism.

ROBERT HAROLD PARR

*A man of such a genial mood,  
The heart of all things he embraced.*

In 1920 Harold graduated from the army to Victoria College where he was a lively figure in Theology, taking a summer course. After Matriculation he entered Arts in '21 with his ultimate aim the ministry.

DOROTHY M. PEARSON

*Oh the gladness of her gladness when she's sad,  
And the sadness of her sadness when she's sad,  
But the gladness of her gladness  
And the sadness of her sadness  
Are as nothing  
To the badness of her badness when she's bad.*

R With these ingredients mix seven grains of humour, three grains of impetuosity, and any given quantity of good fellowship. This is the prescription which the Divine Pharmacist used.

CYRIL ROBERT PHILP

*Hail, blooming youth,  
Thou pendulum betwixt smile and tear.*

Started whistling in 1901. Learning early elevated, and mischief brightened his crest at Colborne High School. In Vic. the slippery nature of his tender youth slowly revealed a heart with room for every joy; which along with much academic work filled his days with toil, his nights with restless sleep.

ROBERT WESLEY PHILP

*The cause of girls disliking one another.*

Has done good service with several years at Victoria. Makes botany his chief hobby, although in astronomy he points a penetrating telescope. Intends going into the printing business, having during his "Varsity" days—and nights—edited several evening presses. This does not imply that he just squeezed his way through college.

WINNIFRED MARGARET PYNE

*The good stars met in your horoscope,  
Made you of spirit, fire, and dew.*

Her Philosophy: "Why should we only toil?"  
therefore, begone dull work!

Her English: Punctuated by puns; prone to rhyme.

Her History: Humberside to Philosophy, English and History in '20; some study; essays innumerable; Science dances, theatre parties, pink teas, by the score.

Her Future: Journalism, mayhap; Success, beyond a peradventure.

MARJORIE MARION JESSIE REID

*So well she acted all and every part  
By turns—with that vivacious versatility  
Which many people take for lack of heart.*

Marj. having 'heartlessly ruined digestions by dabbling in the culinary art, now leaves her General Arts for the pursuit of art with brush and pencil.

'Ave a 'eart, Marj!

F. STANLEY RIVERS

*... fill the unforgiving minute  
With sixty seconds' worth of distance run.*

On first appearance at Teeswater, 1902, Stan's unrestrained eloquence heralded either the lucid logic of a leading legal light, or the authoritative asseverations of an academician. Fulfilling the latter prophecy Stan goes from Vic. to Faculty. Having journalistic and forensic gifts, Stan's career is followed with interest by College and Fraternity associates.

ELLA M. SCHMIDT

*The perfect blend and blessed trinity,  
Mind, Heart and Will.*

Born at Tavistock, Ontario. Came up through measles, mumps and religion a sane woman. Greatest mistake was attending an American College. Came into her own at Toronto. Future to be spent in what eons of evolution haven't accomplished—improving the human race.

ARTHUR WYCLIFFE SCOTT

*How glad and bad and mad he was,  
But then, how he was true.*

Began arguing in U.N.B., wandered West for more excitement, returned to "effete" East in 1920.

Specialized in "A" Standing, Sunday teas, bridge, and waterthrowing.

Assisted the Vic. "Bob," 2T4 Executive and S.A.C.

Despite the worries of Labs., always had a grin for everyone.

Headed for—Medicine.

MEDA EVELYN VICTORIA SINGLETON

*The little imp of Laughter  
Laughs in the soul of me.*

Meda has tripped merrily through her four years at Vic., smilingly attending lectures in Moderns, Choral Society, fussing parties and Vic. receptions.

She has weighed all things, both grave and gay, and gaiety has tipped the scales. "Blues" and "Gronches" are against her principles.

Future:—You'd be surprised.

MURIEL HELENA SISSONS

*There ought to be a book written about me,  
that there ought.*

We have always thought that there was something Alice-in-Wonderlandish about Muriel, and when she sits curled up drowsily in the Presidential chair at Lit., then we know why!

As for her Adventures! Oh! My fur and whiskers! Her life has just been a rush from one mod tea-party to another.

Besides, she is Senior Stick. That proves her guilt.

D. MANSELL SMITH

*Hang up Philosophy,  
Unless Philosophy can make a Juliet.*

First cackinnation in the County of Durham; educated at Port Hope; Faculty entrance, 1919; business at Niagara Falls one year; Honour Philosophy; class and Lit. statesman; tennis; Glee Club; studies some, fusses more, plays most; a prospective divine.

# VICTORIA COLLEGE

FRANCES M. SPENCE

*A maid of cheerful yesterdays and confident to-morrows.*

A ready wit that always delights and never cuts. An unusual but interesting combination of perverseness and perseverance. A never-failing sense of humour. A happy nature that can be serious if the occasion requires. An ardent belief in the values of friendship. These and other interesting qualities in Fran make us glad that she left Lucknow to come to Vic.

NINA HELEN STEWART

*Ruminate with sober thought  
On all thou'st said and heard and wrought.*

Nina entered Vic. from Harbord Collegiate determined to pursue the course of Moderns to its glorious end. To this purpose she has devoted herself faithfully—sometimes—to English and French, and numerous duties that have fallen her way. Her spare time she employs in playground work and in music. Level-headed, sincere, possessing that quiet kind of wit which makes her say the unexpected.

ROWENA J. STEWART

*The reason o' the cause and the wherefore o' the why,  
Wi' mony another riddle brings the tear into her e'e.*

These brought Rowena into Philosophy, English and History, whence she emerges puzzled whether the quest has resulted in a dull depth or a deep dullness. A quizzical attitude towards life and a sense of humour provide an antidote to philosophical confusion. "Hers is the love of wilding things;" of birds and brooks and flowers.

ALFRED RUSSELL STONE

*Short and sweet.*

"Stoney" strutted upon this sphere at Highgate, twenty-two years ago. In Vic. has been a constant attendant at the call of POLLY CONN. Guides the destinies of South House, Burwash; and is always ready to keep food from spoiling. Is headed toward the cloth especially at summer resorts! Eternity has a problem so has the church.

GRETA ALLIN STONE

*Nymph of the downward smile and sidelong glance.*

Determined to "gather no moss" this "Stone" from St. Mary's "rolled" into Vic. with the class of '24.

Though occupied with the pursuit of Balzac and Heine, she yet found time to develop her talents for caricature and song.

Here she has no mere acquaintances; for her unassuming ways, sincerity and cheerfulness have made friends, or would-be friends, of all who know her.

JANE EVELYN STOVER

If you ever meet with a nature deep enough to be hard to fathom, in which are mixed together, a happy faculty for giving and having a good time,—versatility which appreciated anything from the sublime to the ridiculous,—a certain naive charm and never-failing courtesy,—ability to achieve more than the average,—love of mischief and a large capacity for friendship,—you'll be meeting Evelyn.

N.B.—She's a product of Chatham.

RICHARD EDWARD SUTTON

*..... a face  
Fresh-coloured, frank, with ne'er a trace  
of trouble shaded.*

Dick's advent at Lindsay brightened the new century. Sporting career at L.C.I.; entered Victoria with 2T4. As a wrestling Freshman, won his "First T," distinguished himself at hockey; golfed occasionally. "Athletic Stick" of 2T4. Consistent fusser, "cheerful cuss," a rare pal.

AGNES L. SYKES

*The mind, the music breathing from her face.*

A true friend she is, and an ardent lover—of animals, and laughter; artistic also, and musical, though she disclaims them both. A consistently successful student, she has no possession in our galaxy of stars. To the West she will return; for still she feels its lure.

Her sentiment:—"I hate a mawkish popularity."

Her constant cry: "My kingdom for a horse."

GRACE EDITH TOYE

*Thou art to me a delicious torment.*

Fond of aesthetics and mathematics you might think her a hardened character, till you find she's even more fond of gossip chat. What we like is a sort of fine sanity and honesty which expresses itself now in laughing disconcertingly at her best friends and again in doing justice to those she can't respect. The only person she does not appreciate is herself. The Captain of Vic. Basketball she's up in C. & F. Her friends but enough. Her motto is "Kindly omit flowers."

REGINALD TRASK

*A propensity to hope and joy is real riches.*

To his father and mother, Alma, Ontario—a son, (Reg). Then in due time Alma Public School, Elora High School. With some work and double time off a grad of Vic. Seasoned with good humour, perseverance, sincerity, and friendliness. The future, with Vic's consent—a "methody" parson.

ROBERT FORBES TREWIN

*He's little but he's wise,  
He's a terror for his size.*

Smiled first August 5th, 1894, at Newcastle, Ontario. Graduated from Bowmanville High School. Enlightened young minds for 3 years at Dundas and Jantville. Answered call to arms, June, 1916. Returned to Canada and entered Arts "On the old Ontario strand." Future brim full. Victoria.

WILLIAM H. TROOP

*A very valiant trencherman.*

The world received this benefactor January 9th, 1900. Crossed the Mill Pond in early years. The Atlantic cut up a bit about it. Went to Low School and High School in Ottawa. Senior Matriculation 1921. Entered Victoria College, Varsity, that fall. "Oh what a fall was there."

WINNIFRED GLEN WALTON

*Sweet are the thoughts that savour of content.*

From Parry Sound and St. Margaret's College to Victoria, where four years study of L'Economie Domestique, hasn't taken any of the joy of life out of Winnifred. Even after a three hour lab. she comes up smiling. Give her a pair of skates, a Household Science Cook Book, or a Ukulele to play with, and she is happy.

EILEEN MARGUERITE WESTMAN

*For she zeas jes' the quiet kind  
Whose natures never vary,  
Like streams that keep a summer mind  
Snowhid in Janooary.*

She showed a heart of purest gold,  
A nature full of candour,  
Well fashion'd in the finest mould,  
The good old gods could hand 'er.

MARION A. WHITE

*She is steadfast as a star  
And yet the maddest maiden.*

As a freshie unobtrusive;  
As a soph. a bit exclusive;  
As a junior most elusive;  
As a senior quite conclusive;  
And her sweetness is conducive  
To a love of Marion.

GLADYS E. WIGGINS

*She was made for happy thoughts,  
For playful wit and laughter.*

The gods were especially generous when endowing "Glad." This versatile young lady can:

Head the Choral Club;  
Be useful on executives;  
On time for a Nine O'clock—never!  
Dance? (Oh yes!)

Enjoy good larks;  
Despise English essays;  
Cook digestible dinners;  
Play on a victorious hockey team.  
What more? We wonder!

# VICTORIA COLLEGE

MARGARET M. WINGFIELD

*Her air, her manners, all who saw, admired,  
Courteous, tho' coy, and gentle tho' retired.*

A homie lass is "Marg." Coming from her native heath, Hamilton, she joined the ranks of 2T4 and learned to "parley vous." Through her lovable and sunny disposition, she has both given and received much from college life. Marg's chief pastimes are cuks, skating and dancing. As for singing, her favorite song is, "Off with the old love, on with the new."  
Future: In any case, a happy one!

MILDRED M. WRIGHT

*She has wit and fun and fire;  
She has the truest, kindest heart.*

From Richmond Hill comes Mildred Wright, In music, art and parties bright, With ever-ready repartee, A repertoire of poetry, Executive ability; Skating and joking, you'll see her too: She's really a friend we call "true blue."

MARION ANDERSON WYLLIE

*I'll be merry and gay  
I'll be sad for nobody.*

Through the long road to graduation, Marion has kept her eyes blue and her heart gay. Since she left her home in Kamloops, her four happy years at Vic., crowded with friendships and good times, demonstrate a successful mixture of work and play; books, dance programmes, essays, Lit. stunts, Acta, Dramatics and psycho-analysis. Her infinite variety will make life far from monotonous.

## Class History of 2T4, Victoria College

---

Some one, anyone, everybody roar,  
2T—, 2T—, 2T4,  
Rima, rama, chicka, wah,  
Zis, boom, bah,  
2T4 Victoria,  
Rah, rah, rah!

How significant are those familiar words, whenever and wherever we hear them. To us, they will ever recall those stormy days of our first year, when, with much skill and caution, we had successfully baffled the Freshman—thirsty Sophomores, and had gathered in some distant church to practise that yell. How proud we were when its thunderous roar deafened the audience of our first “Bob.” Oh! the trials of that “Bob,” its anxiety, its intrigue, and our own reliance placed without suspicion upon an enemy in disguise! With characteristic perseverance, however, we eventually found a trustworthy president. Alas! I fear the presidency was the cause of endless debate in the year of '20-'21, when the women began to assert their equal rights,—since that worthy struggle peace has reigned supreme.

In the Fall of '21 we returned much wiser and much sadder men and women, for some cruel fantasy of fate had reduced our class to half its original number. Although the depleted ranks were reinforced, never shall we forget the old friends who were with us at those first “Bob” practices, the initiation and the scrap. Nevertheless, our men arranged a glorious battle, whose equal the friendly elm which guards Victoria's campus has not since witnessed. Class hikes and skating parties helped us to become further acquainted, and to make us feel as if we were all part of a complete circle.

Soon the Spring of our Junior year came round, bringing with it both sadness and gladness, for we were all sorry to lose seven of our loyal classmates, yet we rejoiced in their success and in the honour which their overseas service brought to them individually and to the year, as a whole.

In no time, a continuous round of games, studies, lectures, meetings, receptions, parties and examinations has brought us to our last term,—a milestone from which we glance backward o'er the last four years of play and toil, then forward to the future, as we wonder in vain about its solution.

In every department, we have shown a keen interest, both in action and in rooting. In Athletics especially, 2T4 has excelled. Several of our classmates have won places on intercollegiate teams, and in this respect the women are indeed worthy and friendly rivals of the men. Our men were of valuable assistance in bringing to Victoria the Mulock Cup in 1920 and in 1924, and the Jennings Cup in 1922, as well as individual championships in the fields of track, boxing and wrestling. Many of our members are splendid debaters, and two of them have won oratorical prizes. Perhaps most noteworthy is the glory and distinction due to our Rhodes Scholar, the first in Victoria since 1910. Moreover, excellent dramatic talent is to be found in our midst, as well as abundant executive ability and originality.

As a class we are proud to form a chapter in the history of Victoria, and to carry on through the years to come, the love of justice, of brotherhood, of peace, and of truth—the traditions of our Alma Mater. Holding aloft her banner, may we ever strive toward our future goal,—

“That we may rise on stepping stones  
Of our dead selves to higher things.”

# To the Graduating Class of St. Michael's College

by

FATHER CARR

---

At the moment of writing these words along the lines of Canadian Nationality I am told that a quarter million Canadians crossed over into the United States during the past year at Detroit alone. It is a fact that we have been losing more to the United States than we have been gaining from Europe. Under the circumstances it is pretty difficult to be very enthusiastic about the future of Canadian Nationality. Of course one could ignore these facts and shout aloud the wonderful expanse of Canada, Canada's unlimited wheat fields, her untold resources of wealth in forest, mine and stream. It sounds well, rings true and stirs the blood. Alas! these were all here a thousand years ago. The difference between then and now is largely that at that time none of the present breed of Canadians was here. If the present flow to the south continues it will not be long before there will not be many of the English speaking stock of Canadians of to-day living in Canada.

I believe that Canadians have something distinctive about them, that there is some ground for laying claim to a nationality as far as character is concerned. An odd one from the British Isles, especially if he comes here at an early age, assimilates Canadian characteristics. As a rule we must wait for the second or even third generation before we find the true Canadian type. It is one of which we have every right to be proud. It is this type which is passing over to the south by hundreds of thousands and it is being replaced by people from Europe who will take two or three generations to be as much a part of us as those whom they are replacing.

There will never be a real Canadian Nationality before this problem is solved and it will never be solved until it is fairly faced by the best thought of the country. University graduates, if any, realizing the danger and fired by a love for their country should be able to lend help. In many cases people would be willing, at some sacrifice to themselves, to remain here if the matter were presented to them in the proper light. Such a means as that must, however, prove inadequate to stop what looks like a natural stream. Some natural remedy must be found. Let us all put our heads and shoulders together to avert this ruin which is hanging over our country.

## ST. MICHAEL'S COLLEGE

LUCIUS F. BARNETT

*A student by day, a mystery by night and a gentleman always.*

St. Catharine's first ray of intellectual light blazoned forth in 1903. Came to S.M.C. with matric in 1920. Possesses remarkable executive ability. President of Second and Third Years respectively. Editor of Year Book, 1923; Advisory Editor, 1924. A boxer of renown. Academic honours cannot be denied him. Prefers extra-mural entertainment. Success assured.

ANNA M. BAUER

*But let me laugh a while, I have mickle time to grieve.*

Following family precedent, Anna came from Waterloo to St. Joseph's, matriculated there and pursued the General Course successfully. Has served on various committees and has become prominently identified with the life and interests of her college. For her to be known is to be loved and appreciated.

EVELYN M. BURKE

*Her soul sincere,  
In action faithful, and in honour clear.*

Born in Ottawa (you should hear her pronounce it!). Evelyn graduated from Rideau Street Convent with Matriculation Honours, and joined the Moderns Class at S.J.C., in 1920, obtaining good honour standing each year. Prominent on executives, President of her year, Senior Representative to W.S.A.C., thorough, clever, musical and a staunch friend.

J. VINCENT BURKE

*One may smile and smile and be a villain.*

His infant wails and boyish pranks ruffled the even tenor of Alliston's ways. Migrated to St. Michael's where deep mulling of the Perian spring failed to quench an insatiable thirst for English, History and Theology. His contagious laugh, his congenial manner, his ability to be serious have won him a host of friends and presage a brilliant future.

MARIE RITA CAMPBELL

*Marie, thou art an excellent devil of wit.*

She has such versatility  
And takes the cake at repartee  
Parce qu'elle a beaucoup d'esprit  
In English—vast ability  
The Prof's delight in history  
Suggests one book but she reads three  
Her stage fame is a certainty  
Of diverse roles she holds the key  
All this and more make up Marie.

GERALDINE COFFEY

*There is no wisdom found  
In being wiser than we need.*

Born and educated in Toronto, "Gerry" did honour to that city by beginning her higher education at fifteen. Has taken considerable interest in debating and aspires to a term at Osgoode Hall.

MARY MARGARET DOBELL

*Now thy task has ended, the splendour of thy sun  
Sheds its setting glory on the greater life begun.*

Mary is a native of Toronto. Matriculating from St. Joseph's High School in 1920, she entered Arts '24 where her success testifies that her time was well spent. We wish her all success in her chosen profession.

EILEEN CECILIA DUNNIGAN

*Shall I compare thee to a summer's day?  
Thou art more lovely and more temperate.*

A Toronto girl and a Loretto pupil throughout her educational career, Eileen excels in histrionic ability and leadership in debates. Achievement in these arts is enhanced by her charming personality which justifies the applied Shakespearean epithets, specially exemplified in her never-varying gracious manner.

# ST. MICHAEL'S COLLEGE

FREDERICK A. DWYER

*Why should life all labour be?*

A Torontonion born, yet truly has Fred imbibed the spirit of St. Michael's. Of the "pot pourri" of her life he has partaken, and fortified with her traditions fares forth. Purposeful, genuine, the peerless friend, he is a true sportsman.

BASIL S. ELLARD

*No more I waste the wakeful night to pore  
The Schoolmen and the sages o'er:  
The Queen of Midas slept, and so may I.*

Born in Brockton, Toronto, 1903. Matric. at De La Salle and thence to Class '24. Quiet perseverance and fidelity his assets; Literature and Philosophy his endeavours; libraries, yacht clubs and handball his failings. Athletic Rep. Future?

BENJAMIN N. FORNER

*He loves a book, a pipe, and friends to gather round.*

Born '99 at Monroe, Mich. Heard of Canada and came over. High School course at Assumption College, Sandwich. Spent two years in Texas as a pedagogue. Entered Modern History and Theology, 1921. Member of Historical Club and Quindecim. Star punter and line-plunger on St. Michael's Intermediates. A strong supporter of the Independent Party and of Andy Gump.

ELEANOR GARDEN

*So when my tounge would speak her praises dew,  
It stopped is with thoughts astonishment,  
And when my pen would write her titles true,  
It ravisht is with fancies wonderment.  
Yet in my heart I then both speake and write  
The wonder that my wit cannot endite.*

WILFRID L. GAVARD

*Variety is the very spice of life  
That gives it all its flavour.*

Wilf first wiggled his toes in Thorold, twenty years ago. Brilliant matriculant, winner of K. of C. scholarship in First Arts, is now graduating from Honour Philosophy. Managing Editor of the Year Book, Vice-President of S.A.C., and popular Manager of the Inter-Collegiate Rugby Team. By undisputed success in all his past efforts, he has laid a most substantial foundation on which to build that fame which will undoubtedly be his in the years to come.

ELSIE A. IRVINE

*She is steadfast as a star,  
And yet the maddest maiden.  
She can wage a gallant war  
And give the peace of Eden.*

With all the gay optimism of youth, Elsie entered English and History, bringing the same enthusiasm to everything else. Add to that enthusiasm her spontaneity, and her intense interest in life and you have the secret of Elsie's success.

AVERILLE M. KAVANAGH

*She looked wise, which was quite as good as understanding, and not half so much trouble.*

From Penetanguishene H.S. entered the General Course at S.J.C. Proving apt in Modern Languages, she undertook Honours therein. The French Club and Glee Club have shared her active interest. Fourth Year representative to Year Book, President of W.I.C.D.U. A frank, sympathetic, generous companion, unwearied in the courtesies that sweeten life.

EUGENE CARLISLE LEBEL

*He is small but he is wise,  
He's a wonder for his size.*

Such is the consensus of opinion. Sarnia witnessed the frolics of his infancy and youth. Assumption College welcomed the task of developing the prodigy. St. Michael's is completing it. Brilliant student, and all-round athlete. "Connacherian" in athletic pursuits. Captain and star half-back of the college "twelve." Popularly known as "Nig." Cool, calm, and collected.

# ST. MICHAEL'S COLLEGE

EDWARD G. LEE

*He coude roste and sethe and broille and frye  
Maken mortreux and wel bake a pye.*

Initial bow July 7, 1901, at Ottawa. Still shows effects of fifteen years' residence there. Matriculant of Harbord Collegiate. Member of numerous clubs. Indulges in Intermediate rugby but letter-writing his chief sport. Avocations—cuisinerie, photography, walking.

THOMAS A. MacDONALD

*Even though vanquished he could argue still.*

Of the hardy fisherman type from Bay Du Vin, N.B. Received his elementary training at St. Thomas College, Chatham. Responded to call of higher education and came to Toronto. Honour Graduate in Science. Keen lover of all sports and an outstanding star in baseball and handball. A fearless, expert boatswain. Enjoys a good joke and a hearty laugh. Scotch. Has pedagogical ambitions.

JOSEPH A. MAHON

*Even though vanquished he could argue still.*

Born at Aberfoyle, 1895. Matric. at Guelph C.I. Later he taught for some years in the West and N. Ontario. A couple of years in the army, entering St. Mike's in 1921 as President of his year. Last year he became International Inter-Collegiate heavyweight Boxing champion and is now Secretary-Treasurer of the B. W. & F. Club. Success is assured him.

ISABEL M. McCORMACK

*She is herself of best things the collection.*

A boom began in Battleford, Sask., July 31, 1904, with the arrival of Isabel. Obtained Senior Matriculation at B.H.S. Success has been hers in the Class 2T4. President Students' Mission Crusade, Torontonensis Representative, Secretary French Club. Favourite pursuits—Latin, Mathematics, Music, Skating. The best of pals. Motto, "In adversis laeta."

JOSEPH E. McGAHEY

*None but himself could be his parallel.*

Joe first took a decided interest in life at Toronto on Sept. 21, 1902. Attended Riverdale Collegiate and S.M.C. His trophies and honours already include two gold medals for oratory; the Gough tophy; Presidency of S.A.C. and Quindecim, a political club; twice Premier of our Parliament; Bus. Manager of the Year Book, 1923; and quarter-back of our famous Intermediate Rugby team. Primarily a leader of men Joe will undoubtedly reach the topmost rung of Fame.

FRANCIS J. McKEON

*Surely in toil or fray,  
Under an alien sky,  
Comfort it is to say,  
"Of no mean city am I."*

Mankind and Hamilton first beheld him in 1903. After matriculating from St. Mary's High School, St. Mike's claimed him, and 2T4 acknowledged another sportive genius. In him Indoor Baseball, Hockey, and Football have a tireless disciple. Manager of this year's O.H.A. team. His possibilities are unlimited.

JANE E. MULVIHILL

*L.A.C. lays claim to you  
Genevieve so sweet and true  
From the land of dream's enthrall  
To the threshold of Arts' Hall  
Where fancies play and Wisdom's youth  
Proceeds to meet white star of Truth.  
Your hockey team has loved your play  
And Newman Hall, what heavenly strain  
Reveals the lay,  
"One cherub stole the heart away."*

TIMOTHY C. MULVIHILL

*A table-talker, rich in sense,  
And witty without wit's pretence.*

First disturbed the equanimity of Arnprior in 1899. Left A.H.S. with matric. in 1917. Fought the wolves of the North for two years, and then came to S.M.C. One of the foremost pedagogues of the Frontier College. A hockey-ist of no mean ability. His patron Saint is St. Mary.

Future:—Adventuresome.

# ST. MICHAEL'S COLLEGE

ELEANORE MARY MURRAY

*A quiet manner, pleasant smile,  
And when she speaks 'tis well worth while  
To listen.*

A little work, a deal more play,  
One lecture maybe two, a day,  
A social chat, a tea-dance here,  
Hard study when exam's draw near;  
Ah! that's the way, the only way,  
To do a College Course, I say.  
Matriculated and graduated from St. Joseph's.

Clever, lovable, kind.

AUSTIN D. O'BRIEN

*All men have their faults; too much modesty  
is his.*

"Sham" was first heard of in Peterboro in 1898 where he received matriculation, entering St. Michael's in 1917. A short sojourn in the army. Then in '21-'22 at Assumption, receiving his "A" for athletics, back at St. Mike's to graduate with 2T4 in Philosophy. A wearer of the "M" and prominent in Rugby, Baseball and Hockey.

DANIEL CHARLES O'BRIEN

*But when he speaks what elocution flows  
Soft as the fleeces of descending snows.*

Merrickville was surprised in 1899 by the arrival of our youthful prodigy. Matriculated in '16. After a year spent in moulding young minds in the West, and an exciting episode in Winnipeg, came to St. Mike's. Physical instructor on the Irish Flat and 1923 Sub-Prefect of the Sodality. An unsurpassed devotee of Morpheus.

J. THOMAS O'BRIEN

*His only labour was to kill the time,  
And labour dire it was.*

"Tom," a suburbanite of Hamilton, graced our planet in 1900. Matriculated in '15 from St. Mary's High School. Thence he came to St. Mike's for a two year sojourn. After four year's fruitful experience he returned as a student of 2T4. His athletic repertoire includes rugby, indoor baseball and local gymnastics.

KATHLEEN MARY O'NEIL

*The heights by great men reached and kept,  
Were not attained by sudden flight,  
But while their sporty schoolmates played  
They studied steadily every night???*

"K" belongs to that interesting class of people in whom are found the remarkable combination of brains and the ability to be a good sport. Scholarships, tennis, baseball, and singing (!) are some of her many achievements.

MICHAEL C. O'NEILL

*A kinder gentleman treads not the earth.*

With passports from Vankleek Hill Collegiate and a distinguished career in France, Mike adopted the double blue in '21. President of Second Year, President of St. Michael's Literary Club and member of the Quindecim. Managed Jennings' Cup '23. Member of Intermediate Rugby squad.

A true friend, a scholar and a gentleman.

AGNES C. PINEAU

Oh Windsor was the root and clever was the fruit,  
And blooming was the youth that burst the pod.  
For "Peanut" led the throng, of the happy and the strong  
Who sometimes ran right merrily but more times had to plod.  
But a better, and a finer grad, and one more really free,  
Were hard to find among the grads. that went from L.A.C.

MADELINE ROACH

*So gentle, sweet, so lovable and true  
Yet full of life, or fun and sport are you.*

Madeline has distinguished herself not only academically but in practically every sport. Captain of basketball with a place on the senior hockey team and first place in L.A.C. tennis. Her executive ability will be a byword for future generations.

# ST. MICHAEL'S COLLEGE

GERALD VINCENT SHARPE

*L'illusion féconde habite dans mon sein  
J'ai les ailes de l'esperance.*

Born on the shores of St. Clair River, Jerry lived up to family traditions by displaying marked aptitude for learning. Studied at Sarnia C.I. and Assumption College. Brilliant record at Honour Matriculation. Overseas with the Tanks. Entered Moderns at Varsity. Accomplished musician. A true friend.

MARION SULLIVAN

*Oh somewhere waits a king's son and  
I shall be his bride.*

In her capacity of class President and President of the "Lit" 1923-24, to say nothing of her long connection with the At-Home Committee, Marion has proved her executive ability. As for her athletic career—words! words! idle words!

WILLIAM BERNARD TOOLE

*And just as far as ever from the end.*

Geneva, N.Y., was the scene of "Marty's" early activities. Joined the class of 2T0 in Classics. After several years absence, returned with his interest in athletics, especially baseball, as keen as ever. Inter-faculty debater '18. "Marty" has a congenial disposition and two sweet flavoured pipes. We secretly feel that Isaac Walton is his hero.

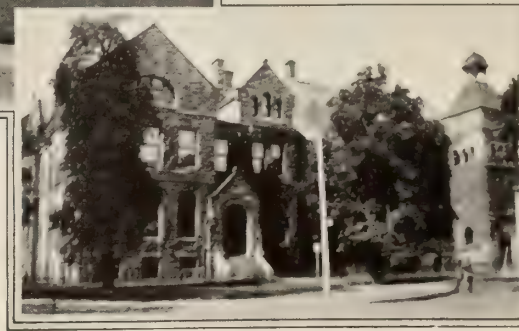

THOMAS J. VAHEY

*We won the war.*

Early years passed in Youngstown, Ohio. Emigrated to Assumption College, Sandwich, 1914. Addicted to Classics and handball. Matriculated 1917. Came to S.M.C., 1920. Continued Classical predilection; added basketball, baseball and billiard to athletic interests. Formidable in private discussion. Vocal, devotee of St. Cecilia. Theologically inclined. Graduates with no regrets.

# A Message to the Graduating Class of 1924

by

PROVOST SEAGER

---

For a new generation of college men and women to put themselves in line with the growing national spirit in Canada is to attune themselves with the future. Out of the last century struggle for Representative Government proceeded an infant national spirit given room and atmosphere of growth in Confederation, and started on its real career through the linking up of the far scattered portions of our Country. The year 1885,—the year of the completion of the Canadian Pacific Railway,—our greatest national undertaking so far—was epochal in the history of Canada. Since that date, the growth of a national spirit in Canada, affecting profoundly and actively

every department of our political, social, educational and religious life, has been astonishing. One almost rubs one's eyes when comparing the Canada of to-day with that of even twenty-five years ago.

It is a curious and a fascinating development, shaped by two

potent circumstances. The first of these is our strategically dominant position geographically—always a determinant factor in the life of any country. Situated in the northern half of the North American continent, between the two oceans which wash the shores of Europe and the East, Canada is a link between the two great areas of the world's development. The consciousness of this fact could react in only one direction—the gradual emergence of a sense of self-identity—not yet very profound, it is true, but, as the internal and external problems of our situation force more and more attention upon ourselves, inevitable in its development.

The other circumstance is that sense of identity with the destinies of the British Empire which lies so deep within our national soul, and which, over and over again, has burst out in a tide of almost passionate, at times even apparently reasonless and entirely instinctive, devotion. The events of the Great War, needless to say, have not only immensely deepened this feeling, but definitely committed the Canadian people to a relationship to the world's life through the British Empire.

Out of the interplay of these two forces, Canadian national spirit is developed. Both must be carefully reckoned with. He who fails to perceive the presence and the significance of either (as some apparently do) will find himself out of the main current of the future.

The destiny of this young nation, the slow but certain interlocking of her unfolding giant powers with the world forces of the future,—who can say? One thing, however, is clear: the day calls for an enlightened, sincere, unselfish, and truly patriotic citizenship. May the graduating class of '24 number themselves among those with the vision and the moral power to rise to the occasion.

## The History of the Commerce Course

---

Several years ago a course in commerce was included in the University curriculum, giving not a degree, but a diploma. There were two students under one graduate.

In the autumn of 1920 some twenty-five students, including three "co-eds," came to the University to enrol in a new commerce course leading to the degree of Bachelor of Commerce. Those twenty-five have sadly diminished in numbers and the present fourth year numbers only seven. The course, however, has proved very popular and the number of students has increased rapidly. In the second year of its existence it attracted about thirty freshmen; in its third year forty and in the fourth the men and women numbered slightly over eighty.

In the first year of its existence the male members of the course formed an organization known as the Commerce Club of the University of Toronto, the purposes of which were to look after the interests of the members of the course; to promote a spirit of fellowship amongst them and to carry on discussions on various topics of interest. In this they have had a fair measure of success, both in regard to the interests of the members and in many successful meetings held during the past four years. The present graduating year leaves, feeling assured that the course will grow in strength and will have many successful years.

## THE COURSE IN COMMERCE

JAMES F. CLARK

*E'en marvel on till time makes all things plain.*

Xmas in the Clark family was spoiled by the appearance of this prodigy on Dec. 22, 1901. Matriculated from Ottawa Collegiate with much joy and a few honours in 1920. Entered the Commerce course that Fall. Tried football, hockey and dancing with Jr. and Sr. Arts. Intends to follow Horace Greeley's advice.

WILLARD GEDDES GRANT

*I wish he would explain his explanation.*

The irrepressible "Choppy" convinced Trinidad of his entity on Feb. 16, 1903. Avidity for knowledge lured him to St. Andrew's College in 1919 and here he gained a signal distinction for both academic and athletic ability. His chief interests at the University have been Commerce, Soccer, Brown Bread and Milk.

JOHN HYSLOP LUXTON

*With them the seed of Wisdom did I sow,  
And with mine own hand wrought to make it grow.*

Sept. 10, 1899, added to Autumn glory "Red" Luxton. Matric. at Shelbourne High School. Entered 2T3 General course. Transferred to 2T4 Commerce course. President Commerce Club, 1924. Bashful but none the less popular.

LYNN STUART MORGAN

*I'll put a girldle round about the earth  
In forty minutes.*

His coming to Varsity heralded '20. Entered, a pioneer of Commerce Course. Malvern Collegiate assumed responsibility. Spent four years trying to capture "marginal utility." Still trying.

Interested in U.C. group S.I.C. One of originators of Commerce Club. Firmly convinced two heads are better than one. We wish him luck.

FRANCIS JOSEPH SERVAIS

*I never felt the kiss of love  
Or maiden's hand in mine.*

Born in Port Arthur. Matriculated from Collegiate in '18. Captained their hockey and basketball teams and presided over the Lit.

St. Michael's in '18. O.H.A. hockey and rugby with their intercollegiate squad. Vice-President of Newman Club. Vice-President of Commerce Club. Original in Commerce Course. Has many friends and will make more.

CHARLOTTE ALICE McCUBBIN

*All are not black who dig coals,  
Nor all white who are millers;  
.. Nor all men who study Commerce.*

Saw real value of University education so emigrated from Chatham to Toronto. Several months' unproductive labour in Moderns; entered Commerce and survived annual crises. After four years in Residence is an ardent free trader. Next enterprise: Post-graduate course at Business College.

OWAIN LLEWELYN WYNNE-ROBERTS

*The world knows nothing of this man yet.*

Capetown, South Africa, entered another claim to fame on his arrival in 1902. Schools: Merrie England, Regina and J.C.I. Entered Varsity at an early age in C. & F. Thought he knew enough so entered business. Found he didn't, so lined up with Commerce. Devotee of rowing, track, terpsichorean art and incidentally the Mademoiselles.

# To the Graduating Class in Medicine

by

DEAN PRIMROSE

---

The graduation of the present class of students of the final year in the Faculty of Medicine marks an interesting epoch in the teaching of medicine in the University of Toronto. It is the last group of students to graduate under the old requirements of five years of study. The new curriculum for the degree in medicine demands an undergraduate course extending over six years. If we consider also the higher entrance requirements (honour matriculation) we find that practically an additional year in preparatory study is now required before the student is eligible to register, and to enter upon a course of professional training in Medicine in this University. Thus it becomes apparent that the demands on the time and the financial resources of the student

have grown tremendously in the last score of years. Those of us who are senior teachers in the Faculty of Medicine had to be satisfied in our student days with four years of professional study; our immediate predecessors, in turn, qualified in still shorter time, and in a former period, still more remote, the apprentice system was in vogue, while the University in the main merely made provision for didactic lectures, conducted examinations and conferred degrees.

We may therefore with profit inquire into the purpose of the present exacting requirements of a curriculum in Medicine. The advance in science, in all its branches, in the last quarter of a century, has been tremendous. Many new discoveries of scientific truth have been applied to the practice of medicine. It therefore results that, in order to keep abreast of the times, it is imperative to devote more time to pure science on the one hand and to the study of the clinical application of scientific truth on the other. The curriculum in medicine to-day is framed for the purpose of educating men and women to become general practitioners. It represents the minimum requirements for a thorough training such as is essential for general practice. It has been stated that each patient treated by the doctor, in his daily routine of work, presents a problem in scientific research and so it comes about that the student in medicine must become saturated with research methods both in the foundation sciences of medicine and in the scientific investigation of disease at the bedside.

Medical education is attracting world-wide attention at the present time. The curriculum of study is constantly under revision. International conferences are held annually, prominent educationalists travel from one important centre to another for the purpose of learning the methods of individual institutions at first hand. There is a well organized effort to reach the ideal and, on viewing the situation, one is justified in concluding that the practitioner of the future will have the highest possible qualifications to combat successfully the problems of disease and suffering. He will thus be able to render the greatest service to humanity.

The course of instruction at Toronto has attracted wide-spread attention. Most favourable comment has been passed upon it by many educationalists from abroad. The hope is that our graduates may be found to have received an education second to none of those who are engaged in medical practice and that they will be equipped as never before to assume the duties of Canadian citizenship in a field of usefulness where they will be called upon to minister to their fellows in the preservation of health and in the cure of disease.

W. LAWRENCE ATKINSON

*He moves  
To learn and not to pursue, he gathers to teach.*

In three professions he has moved,—that of pedagogy, that of arms, and now of medicine. If 'tis from these he has won, respectively, his patience, his constancy, and his skill, the purpose behind the movements has been fully justified in the result. "So, the earth has gained by one man more."

FRANCES MARGARET BAKER

Her future will not prove a blank.

In friendship's name.*

Springfield, Ontario, claims Grant's allegiance for there he remained from his birth in July, 1899 to May, 1917. Served with R.F.C. until enlistment with old '24. # The History of Medicine, 2T4

---

Medicals, Medicals, Medicals mighty!  
Gallipoli, France, Belgium, Blighty!  
Measles, Mumps, Gangrene, Gore!  
Varsity, Medicals, 2T4!

Cease Fire! Out of the cloud of smoke and the ruins of many nations, marched the young manhood of Canada. To those whose pessimism and distant view raised fears for young Canadians' ambitions as a result of the war, no antidote could have been more effectual than the inspiring sight offered by the swarming of our ex-service men back to the tree of knowledge. No branch of that tree was more radiant than our own Varsity. With a total attendance of some 6,000 students, and freshman classes in all faculties greater than ever in the history of the university, class rooms and laboratories were crowded beyond the point of consistent with efficiency. Of this assembly medical freshmen constituted 416 men and women. The new regulations requiring six years study had just come into force; but granting the educational advantages of life and travel in military service, the Senate sanctioned the organization for 212 returned men and women of another and final class for the five-year course. Thus came into being in September, 1919, Toronto's Medical returned-soldier year, the Class of 2T4.

The peculiar character of this year was early manifest. After solving the puzzle of faculty registration and class enrolment, attention was immediately focused upon the sophomore year and organization rushed to anticipate a surprise attack by that traditional enemy. Discretion being the better part of valour, however, the sophomores, aware of the superior numbers of the first year and the experienced "scrappers" of 2T4, paid us the compliment of attacking 2T5 on a morning when our lectures began at ten o'clock.

The irony of study of the Relation of Science to Civilization being too much for returned men, that subject was happily withdrawn from our curriculum.

The reaction to war curtailment of social functions found free expression at Varsity during those early post-war years, and interjected between hours of enlightenment concerning comparative anatomy and the pent up power of the atom, 2T4 had its fling. Besides the complimentary banquet to the sophomore class and the first annual year dance, the Varsity Veterans' informal dance in the Fall,

their informal At-Home in the Spring, the Medical Society At-Home and a class skating party in January provided many opportunities for sowing the seeds of friendship found now in full bloom.

Undaunted by the retreat of our worthy president into the sanctuary of domestic bliss, large numbers of the class found great glory on athletic fields. Besides having five men in the senior rugby squad, three Intercollegiate Boxing championships were won, and a creditable number helped the senior soccer team bring home the Intercollegiate championship. In interfaculty competition our stalwarts helped Junior Meds win the Mulock Cup in rugby, the Jennings's Cup in hockey and the Davidson Cup in the Assault-at-Arms. Tending now to an exaggerated idea of our importance, our allocation of seats to the ulterior regions of Convocation Hall for, and the withdrawing of the first years' stunts from, the Daffydil program, together with the approach of Spring examinations, adequately reminded us of our lowly status in university life.

The passing, just at the close of the session, of our much-respected classmate, Mr. A. B. Osterhout, rang down a rather sad curtain upon a very happy and beneficial year.

In spite of the casualties entailed the first time over the top, a muster parade on registration day of the second session showed a full strength unit (212) ready for another "do." Involved in the puzzle of the structure and function of the human body, not much time was offered for fun and frolic. But duty demanded an initiation, and despite the loss of our O.C., Mr. I. Lloyd Johnstone (carried by the current of fortune back to "Blighty" to the Middlesex London Hospital), a stratagem in which two sections of 2T6 were pitted against each other for a number of minutes before being pounced upon by 2T4, gave us an easy victory over the freshmen in the "authorized rush" at the stadium. Graced with a little more consideration for our captives, however, than is perhaps the rule, we endeavored to remove the mud and grease which they received in the conflict by head-on immersions in a large vat of water. Armistice Day was celebrated by a theatre party to Pantages. The

social round included all the functions of the previous year and a few more. Representatives of 2T4 were found on the various athletic teams, including the Rugby team, which won the Inter-collegiate championship, the Med. Interfaculty Champion Harrier team and Intercollegiate Champion Harrier team, as well as the Jr. Med Basketball team, which was in the finals for the Sifton Cup. This session saw the production of the war-reminiscent play, "P.B.I., or Mademoiselle of Bullygrenay," which leaped into immediate popularity and which numbered some of 2T4 among its cast.

Mr. Peter Brown, a much respected, if not well-known member was removed from our midst by the Grim Reaper; and Mr. George McGilveray, our genial treasurer and industrious worker for the class, was much missed when illness necessitated his discontinuing the study of medicine.

Then opened the confusing third session with a roll of 209. Many were the bewilderments and discouragements of this first clinical year. Brain grinds and teeth grinds went hand in hand during the first term, but the co-relation of the mass of detail learned by the end of the year provided a satisfaction disturbed only by the inevitable "orals." Assisted by members of 2T4, Senior Meds met and defeated in the finals for the Mulock Cup the Junior Med team (which was coached by a member of 2T4). The Sifton Cup was also garnered by Sr. Meds. By this time the superfluity of social enticements had passed; but besides the usual year and faculty dances, the Hart House Masquerade added much to the year's enjoyment. Members of the year were especially prominent in the Daffydil production.

The fourth session found the class much augmented by the influx of students from other universities, notably those of Western Canada. Applying ourselves now to the practical side of medicine, the year's work was intensely interesting; though long hours of lectures in the afternoons were sometimes productive of lethargy. To one of the year goes the credit of having introduced the first Annual Medical Athletic Meet. 2T4 also organized Medical indoor baseball and interyear hockey. Dents were tied for the Spalding Cup, and the class provided a majority of the players on the University Curling team, which won two trophies. The Fourth Annual Year Dance was an outstanding success for which the careful appointments and the weird decorations were largely responsible. By the close of the year, news leaked out that our sagacious president, some months previously, had joined the great body of "I do's"—an army of whose recruits the class now boasts some ten.

The final year started off with a bang both in work and play. The former was necessitated by the punctuality of paediatricians, the importance of history taking to the physician, and the irregular irregularity of the obstetricians and emergency surgeons. As guests of Dr. and Mrs. Herbert Bruce, a very enjoyable Sunday afternoon tea was enjoyed at their Lawrence Park residence. The McEachren Cup in tennis was won by a member of the class. The Silverthorne Interyear Championship Cup in indoor baseball has just been added to our list of athletic accomplishments. In an effort to hand on the torch, a "Medicine 2T4 Cup" has been donated by the class for annual competition in the Interyear Assault-at-Arms. Due to the efforts of three men of the year, an undergraduate journal has been instituted for the monthly publication of articles and papers of medical and general interest.

Graduation now heralded by the approach of the Medical At-Home and the Graduation Banquet, a strange admixture of emotions stirs us. We are justly proud of the standard maintained by the class, which numbers exactly that of the first session (212) and of whom over 60 per cent. were in the original freshman class. Of the latter, 65 per cent. have never been required to try supplementary examinations. Ten members were elected to the Alpha Omega Alpha Honour Fraternity, and among these, one (an original member of 2T4), brought special honour to the class by being the first woman in Canada elected to this society. The more mature years and the more serious purpose of the individual members consequent upon overseas service are perhaps responsible for the consistent application which has produced these results. But in addition, the class has attained an athletic record surpassing all previous years. Besides winning four individual intercollegiate championships, they had representatives on at least sixteen interyear, interfaculty, and intercollegiate championship teams. Fifteen men hold University "T's" and two co-eds the women's colours. 2T4 was the only class in the University which provided funds for two shares in the proposed arena, which unfortunately was abandoned. While less prominent in social activities than some classes, those functions which were undertaken have always been carried through to a successful conclusion.

To the members of the Faculty we desire to acknowledge a great debt of gratitude for their untiring efforts in our behalf. May they find their reward in the ever-extending circle of unselfish service advanced by them, and now to be taken up by Medicine, 2T4.

# To the Class of 1924, Faculty of Applied Science and Engineering

by

DEAN MITCHELL

---

You go out this year to a world that is in something of a turmoil and still in a process of transition. We appear still to be surrounded by the results of the war in various ways. We thought not long ago that we were drawing away from these, and we have done so, but we still seem to be confronted with some further process of reconstruction.

To the young engineering graduate this means much, perhaps more than to the graduate in other parts of the University. Engineering is so bound up in the country's activities that it is almost a sensitive barometer of prosperity.

There is no fear that engineering graduates these days will not be absorbed into these activities because they are always needed and always will be wanted from the hour they leave these halls. But there is a fear that when engineering graduates go out under conditions that are uncertain, when confusion exists and when even leaders are perplexed, they may lose some sense of proportion, may lack some appreciation or may miss some inspiration.

It is in difficult times such as we have been going through that we most need and most value all there can be of the spirit of sturdy reliance and loyalty to Canadian ideals. We are people of a class by ourselves as is now frequently being admitted and by certain qualities we appear to have earned some distinctive place.

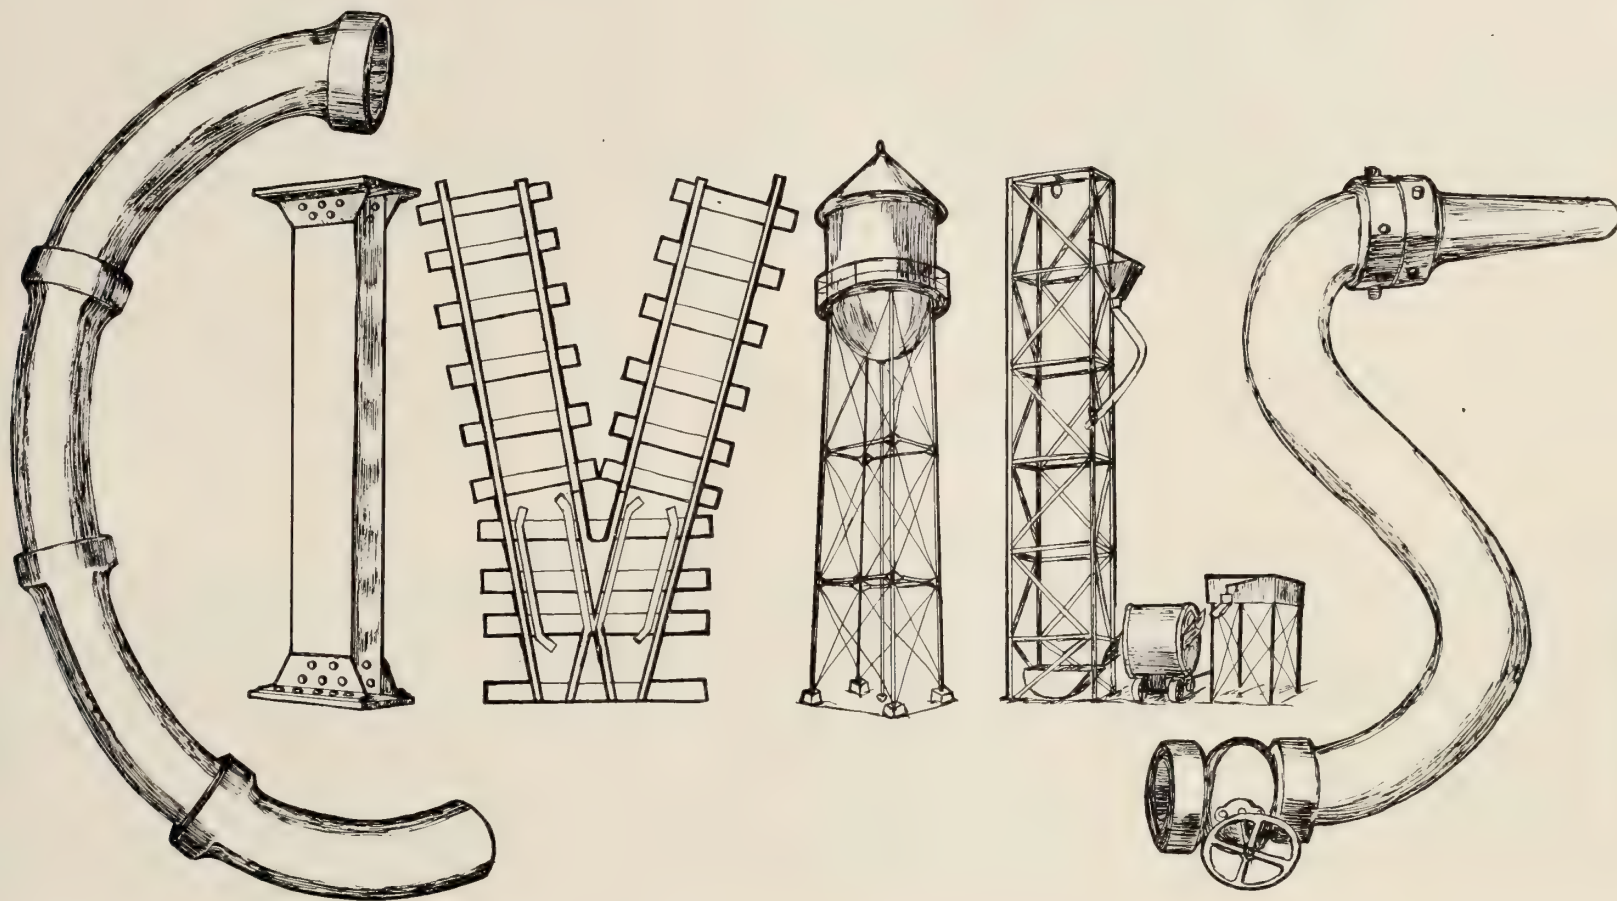

I have often wondered what these qualities mostly are. Whatever they may be, you successful graduates of this great University surely have your share of them and, equipped with that goodly share, you are going out to take your places in carrying on and moulding our Canadian spirit—just as you have done with the imperishable "School" spirit.

Let me offer you a suggestion of these qualities which make our young Canadian spirit and leave you to solve your own equations of them in relation not only to your Engineering, but to your life itself. If Canada means anything and Canadians are anything it is by:—

- C Conscientiousness.
- A Activity.
- N Nerve (Courage).
- A Adaptability.
- D Decision.
- A Achievement.

With best wishes for your success and for your service in the development of Canada.

GEORGE WILLIAM BEECROFT

*A student by day  
And a mystery by night.*

George was born at Little Britain, Ont., 1898. Migrated to Toronto at an early age. Matric. Humber College. 1915-1919 Machine Guns and Engineers. "La guerre finie" he chose Engineering as the next softest pastime. School rugby teams for three years. A typical "School" man.

Hopes to see Paris again.

FRANK BURNHOM BOSWELL

*Ever cheery, ever bright,  
Never weary, never tight.*

First sampled Z2. on Jan. 18, 1901, in Nelson, B.C. Early acquaintance with rod and chain at age of two on Saskatchewan prairie. Galloped through Westmount High School and joined the original 2T4's in 1920.

Civil Club Executive for two years, and Hart House Music Committee for two years.

WILLIAM H. CAMPBELL

*Can crowd eternity into an hour,  
Or stretch an hour to eternity.*

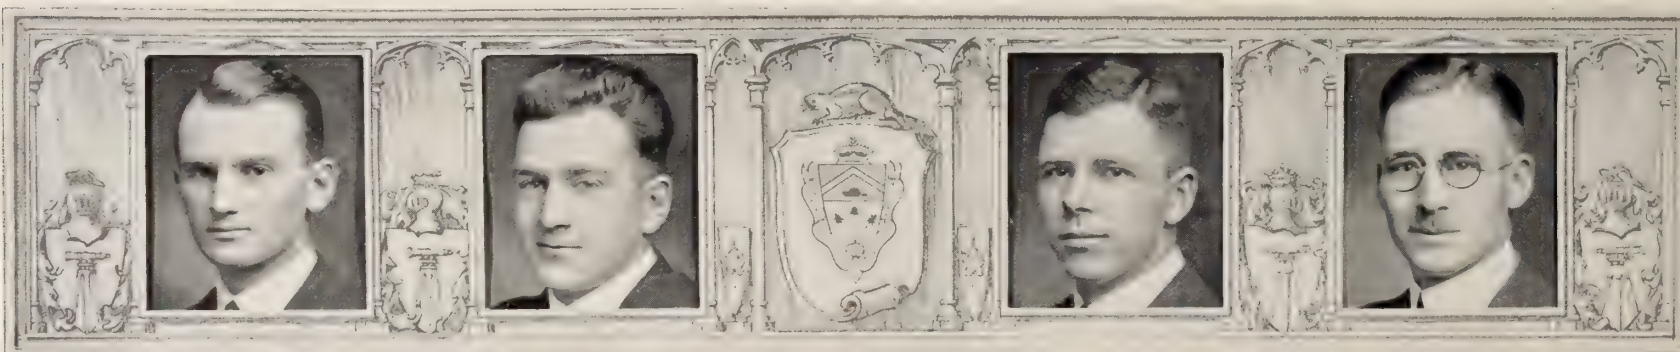

"Bill" first acquired friends at Toronto in July, 1900, and later matriculated from Oakwood Collegiate. Boyhood ambitions chose for him an engineering profession, hence his initiation into School. Chairman of Civil Club for 1923-24. A charter member of School's "House of David."

MAX CARP

*Like an emigrant he wandered  
Seeking for the Better Land.*

"Max" was born in Owrtuch, Russia, on April 26, 1896, and after about 17 years of consideration came to Canada in order to better himself. He attended Toronto Tech., and came to "School" in 1919.

He has always been a very hard worker and has a hobby for asking questions.

AUSTIN RALPH CHADWICK

*A needy, hollow-eyed, sharp-looking, scetch.*

His mother calls him Austin, we call him "Chad." Boosted the population of Niagara Falls, Ont., July 16, 1901. They call him a "Model" boy, chose his future at Toronto "Tech." Civil Club "Shylock" last three years. Monkey business on the Gym. team brought home his "T" and "S." Vice-Pres. Gym. Club, 3rd year, and Pres. of the club in the 4th.

HAROLD JOSEPH ASHBRIDGE  
CHAMBERS

*For every why, he had a wherefore.*

In Swindon, Wilts, Eng., in 1902, Harold first saw light. Having aggressiveness in his make-up he set out to see the world at the early age of 10 years, and came to Canada. Matriculating at Riverdale Collegiate, Toronto, in 1920, he entered School the same year and has been carelessly taking "honours" ever since.

LYOED SETH COLLISON

*A serious mind is an asset to any man.*

In 1902, Leamington became richer by one citizen with the advent of Lloyd into this vale of tears.

From a tiller of the soil to a University student via the usual Public and High Schools, was but one step in the realization of his ambitions. Here his careful and conscientious work augurs well for a successful career.

ARTHUR RUSSELL COLMAN

*Earnestness, enthusiasm tempered by reason.*

Art. born in Middlesex, '97. Discovered Canada, '05. Graced the corridors of North Toronto High School. Helped Currie in France. Entered Prep. Class U. of T., and graduated to 2T4. **HAROLD JAMES CONNOLLY**

*Be good and you'll be lonesome,  
And he is not often lonesome.*

Let out on parole in 1896 and still behaving himself? Caned at Upper Canada College and entered IT9 Arts. Became decidedly fed up in 1915 and so went a 'unting for 'Uns with varied service in the P.B.I. and R.N.A.S., finally providing "free smokes" at Zeebrugge. A born kidder and an all-round Henman.

**THEODORE ROOSEVELT EMERSON**

*He who sings frightens away his ills.*

Born June 12, 1901. Attended Buffalo and Toronto Technical High Schools. A hard worker behind the scenes during the first three years here. A member of Hart House Music Committee, on the School Dance Committee, and also inaugurated and successfully handled the well-known "School Publicity Service."

**ROBERT BLAKE ERWIN**

*I like to work, yes I do,  
But I like to play a "little" too.*

Bert landed near Waterford, September 30, 1900. Ploughed a straight furrow through High School and became a green frosh, '19. Misspent a year in Chemicals, then decided to be "Civil." He has learned a little, had a good time and made friends.

Hobbies: Rugby games, politics and a girl.

**EARL F. GOOD**

*Cool and calm and unperturbed  
By work, but women!*

First "surveyed" the world from Blair, Ont. Feb. 6, 1900. Carved his name on the seats of Galt Collegiate. Emulated "The Barefoot Boy," 1916-19. Strayed into Vic., 1919. Then saw a transit on the Campus and was first to register in School, 1920. Has been an ardent "Civil" ever since.

**ROBERT JAMES GRIESBACH**

"Bert" originated in Collingwood, Ont. Matric. 1917 Collingwood Collegiate. After two years from school, decided on Engineering so wandered into School in 1919. In favour of increase in fees and lectures.

**SYDNEY HARDCASTLE**

observation.*

"Syd's" arrival was duly recorded in the family bible at Liverpool, England, Feb., 1902. At the tender age of twelve he emigrated to Canada, entered "Tech." and after fooling the examiners joined the "Civils" of '24. He became an active member of the Engineering Institute, and given "harf" a chance should rise high in the profession.

**WILLIAM JOHN HARMAN**

*Three rousing beers.*

"Bill" registered in Zephyr Crossing in the early part of this century. Took a sample of education at Uxbridge High School, and came to the "School" for some of the real article. Thinking that there was only a trace of work present, he selected the Municipal option, but has been realizing his error ever since.

Favorite expression: "From the Contractor's point of view."

**ROLPHE WEBB HENDERSHOT**

*Small have continual plodders ever won  
Save bare authority from others' books.*

Hendy hails from Kingsville, Ont., where his tender years were spent in the pursuit of knowledge at the town's educational centres. The lure of the transit brought him to Varsity with the determination to become an engineer. If past performance is any indication, he is assured of success.

However, he managed to "cop" a scholarship each year. Started at School with '24 and passed with honours. During vacation discovered the easier path, and joined the "regular fellers." Though inclined to be quiet, Darby has abilities which will guarantee him a place in engineering.

But*

Harry first added his voice to the general din of the metropolis of Lindsay in 1897. Formed his habits of promptness at the local Collegiate. Deserted the paths of learning for the R.A.F. Persuaded to enter "School" despite the drawback in the registration. Now cherishes hopes of becoming a Bachelor . . .

Pastime: British rugby and sleeping.

WILLIAM THOMAS ARNOLD BELL

*A fellow of infinite jest, of most excellent  
fancy.*

Tommy was born Sept. 28, 1901, at Beeton, Ont. At 2 he obeyed the impulse to go West and received early intellectual nourishment in Winnipeg and Calgary. Tired of the prairie, he entered U.C., saw a man with a sliderule and changed to School, where his wise cracks livened many a dull Lab. Secretary of Billiard Committee; 1922 Billiard champion. Pet saying: "You called it."

CHARLES LESLIE BRITTAIN

*Why all this toil?*

First discovered in Moncton, N.B., Sept. 15, 1902. Later found to occur generally throughout the Eastern States. Came to Toronto in 1914; hence the Great War. Attended Central Tech., but left as soon as he was through. In 1923 captured the Boiler Inspection Scholarship much to the disgust of the natives and the glory of the British Empire.

"Jack" stepped into khaki and took an "extended holiday" overseas during 1914-1919. Apres la guerre, the "little Red School" and the H.E.P.C. landed him. Now displayed with 2T4's presidents, orators, and fathers.

He increased the population of Toronto by one May 11, 1901. Had early aspirations to be an engineer. His pronounced artistic leanings, however, turned him toward Architecture in which department he has done much hard work and not a little whistling.

The C.O.T.C., the S.I.C., a little squash and the Sketch Committee, 1923-24, absorbed a little of his time.

ARTHUR WENDELL PHILLIPS LAWSON

*Sir, your wit ambles well; it goes easily.*

First saw the light of day September, 1898. Brightened the corridors of North Toronto High School for four years. Overseas '18-'19. Started the big campaign with 2T3. Architectural Club Executive '22. Tennis, hospitality and "Beaux Arts" his forte.

WM. MALCOLM SMITH

*He tickled the ivories and the fancy of his friends.*

Added his feeble wail to Brantford's uproar, Nov. 28, '99. Moved to Waterford, then to Saskatoon, where educated in Public Schools. Collegiate, University of Saskatchewan. Brought his breezy presence to Architecture in October, '21. Spends his summers on the tennis courts and piano at Cleveland's House and in between times indulges in Architecture.

ELLIS ALEXANDER AGNEW

*The most patient man in loss, the most coldest man that ever turned up ace.*

April 4, 1900, was his natal day. Since then several of the "Seven Stages" have been fulfilled. U.T.S., then R.M.C., then to S.P.S., after a tour of England, France and Russia. A good student, an attractive personality. Cheerio!

GEORGE CARMAN ARMSTRONG

*What cannot beauty, joined with virtue, gain.*

Marshaled into the world March 4, 1903, somewhere in Northumberland county. Received his early education at Warkworth and Campbellford High Schools. S.P.S. was next honoured with his presence, where he attracted notice as a student and as a bridge enthusiast. Always conspicuous in his winning ways with girls and dogs. The annals of metallurgy will undoubtedly bear tribute to his name.

HAROLD NORMAN BAKER

*Indeed the fellow shows some sparks that are like wit.*

When you meet a man in Chemical Engineering who was born in Toronto in 1900, educated at Parkdale Collegiate and then S.P.S., who was overseas 1917-19 and up in the air most of the time, whose activities in the Chemical Club have culminated in the presidency, and who shoots a mean game of bridge, you may think that you have found something. You have: he's "Bake."

ALEXANDER DOUGLAS BARBOUR

*A fellow of infinite wit.*

Doug, first experimented with oxygen in Montreal, February 5, 1903. Researches carried him through various schools in Montreal until 1918, then to Toronto, Harbord Collegiate and S.P.S. All reactions were marked by consistent first-class results which did not prevent minor experiments in skating, tennis, dancing, music and debating. First class too? Well, ask Doug.

COLIN HAHNEMANN BAYLEY

*This ditty's not a string of lies,  
Yet—how the deuce did Bayley rise?*

Barbados did give me birth.  
Harrison College, education,  
S.P.S. three years of mirth,  
Chemistry a good vocation.  
For the rest why worry now,  
I breathed and lived, what matter how?

GEORGE TAY BERNER

*Plagued with a Leprosy of Wit.*

Tay made his appearance in Toronto on Nov. 16, 1899. Matriculated at Harbord and Technical School, Toronto. Starred at School on the Indoor Baseball Team and occasionally on Exam. papers. A Prof. once recognized his exceptional ability by asking him to continue the lecture. Which he did, and more will be heard of him later.

LESLIE GORDON BUCK

*Full of strange oaths and bearded like the pard.*

Took up the yoke July 8, 1903. Doubled one no trump successfully at age of three. Infant prodigy educated at Brantford C.I. Left to shine with 2T4.

Great works: "Relative motion of spheres," "Bound and Rebound."—Mathematical analyses of billiards and squash.

Leaves School with many friends, no enemies and a future.

ARCHIBALD GORDON CAMPBELL

*I have hid my feelings, fearing they should do me wrong.*

Born April 2, 1901. Was given the name of "Soup," being closely associated with liquids. Appleby and R.M.C. claim him as their own. His favorite game is golf, Inter-collegiate team, 1923 (African and indoor) also proficient at beaver. Nothing bothers him except the ladies, but here is where this ends.

## APPLIED SCIENCE—CHEMICAL

GORDON MURRAY CHUTE

WILLARD MEREDITH CONNORS

*Lady Luck dealt, 'tis ours to play.*

The great event occurred Nov. 27, 1899, Smith's Falls, Ont. **Matric.** 1918, Smith's Falls C.I. Conspicuous in basketball. University of Toronto '20-'24. "School" loses another earnest student and faithful supporter and we all wish him well.

JOHN ARMSTRONG DOW

*Play up! Play up! and play the ace.*

And on the second day of the tenth month, 1902, in the hamlet of Belwood was born a child, and as he grew he waxed mighty in stature and knowledge, attaining honours in the University, and at the Colosseum as a gladiator.

He was good to look upon and found favor in the eyes of the maidens.

FRANK ARTHUR FORWARD

*One may smile, and smile, and be a villain.*

"Scoop" wailed his welcome to a waiting world at Bytown in 1902. His early life remains shrouded in mystery, till Destiny drew him to Toronto where his talents became apparent. His open countenance and sunny smile disarmed suspicion, and he was taken at face value. Fondness for fussing and chemical smells.

ROWLEY ACHIBALD GORDON

*Straight-laced but all too full in bud for Puritanic stays.*

Born 1901, Wallaceburg. Matriculated from Ridley College. Entered "School" in 1920. Missed "labs" and lectures successfully for four years. Fond of German. On graduation "Did" will look for a job. He is a member of Kappa Alpha Society.

HAROLD JAMES HAMMOND

*The kid that handles the music box.*

He was not famous when he was born on Dec. 23, 1901. He is said to have been a remarkably bright and beautiful baby but he soon outgrew all that. He often works and sometimes studies. This bird has never been plucked. Little is known of his future.

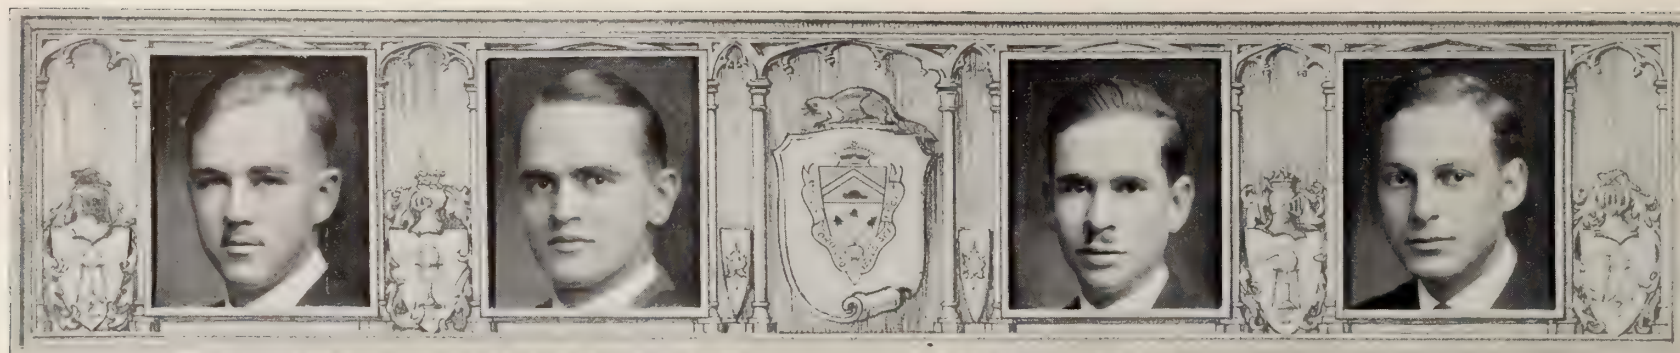

LLOYD CREIGHTON JACKSON

*A man in earnest finds means, or, if he cannot find, creates them.*

Brussels sprouted this one, June 9, 1898. Upper School at Stratford; Faculty of Education, 1917; Wireless Operator in the Navy; earned the "necessary" on the Toronto Public School staff, and reached the climax in his association with 2T4. Interested in tennis, snowshoes, the S.C.M., etc.

# History of the Class of 2T4

---

“Step right up gentlemen---lots of room at the top of the profession”

*(With apologies to the T.T.C.)*

---

The 191 members of the class of 2T4 first foregathered in the “Little Red School” in September, 1920, and immediately the tone of the place, though already high, rose about four octaves. The first bond of sympathy was given by the common misery of dreading the initiations and shuddering in the arms of each other at the thought.

The class can justly lay claim to the title of “The First and the Last.” We were the first to introduce green ties and the classic exhortation, “Lower door, Frosh.” We absorbed the last of the ex-service men, and these gentlemen brought with them the maturity of judgment and balance, which in combination with the youth and high spirits of the rest of the class, gave to the year the punch which enabled it to buck over for yards four times in succession. We were the last to undergo the real old time initiation; who among the elect does not remember the “hot box” of 86 stalwarts with barrel staves? We were also the last to get even with the sophs by forcing them to attend a midnight theatre party (with near-riot attachment) at The Star.

The traditional School spirit in sport was well upheld, and our teams in junior and senior events were always well to the fore, while our collection of individual stars on interfaculty teams was excelled only by the Milky Way.

Having a number of amateur Lotharios whose main ambition was to make Valentino foam at the mouth with jealousy, our parties were always the pride and the envy of the University, and this was due in no small measure to the artists who wandered from their allotted field and found a resting place in School.

W. A. “Bill” Osbourne was the first Moses chosen to lead the gang to the promised land of Sophdom, and though the beard was lacking he went Moses one better and arrived himself. In the first year 18 members of the class got jolted off the band wagon, but the remainder were safely delivered to—

J. M. Dymond (alias “Jack”) the silver tongued orator, “who exhorted the brethren” so well that they surpassed their good record of class spirit and excelled themselves in all the things which a good little year should do, and especially did they prove themselves valiant in the famous battle with Meds on election day, when the hordes of the enemy were rolled in the mud and School won a famous victory. When exam. time rolled by 26 had seen the moving finger write “Mene, mene,—ils ne passeront pas.”

W. J. Reid, another “Bill,” was chosen as the next wielder of the gavel, and under his regime the class assumed the dignity of the junior and essayed to carry it off without grinning. They fooled the staff so well that in the annual ploughing match but 16 of the students went under, and those remaining entered the final year under the protecting wing of—

W. A. “Fred” Becker, who, being an electrical, was a good man to complete the circuit. The class has reached the pinnacle of knowledge, and our official education is all but complete. We have learned how to wangle a locker at Hart House instead of a tote-box; how to be two weeks behind in all the labs without having an avalanche come down from the professorial heights, how to get rooters’ tickets without going to rooters’ practice, and last but not least, the more brilliant have found the secret of getting tickets to Hart House Masquerade.

So far, December 1st, not a single one has flunked in exams. so that gives 100 per cent. perfection. Let’s hope that the percentage of jobs is as good, so that on going out into the hard, cruel world, none of us may be so choked with tears that he cannot sprain his larynx with a lusty 2T4 and “Toike-Oike.”

# The Engineering Society

---

The Engineering Society of the Faculty of Applied Science is the oldest Engineering Society in Canada, but it is far from senility. It was founded in 1885 by T. Kennard Thomson and Herbert Bowman, and in 1886 it had 141 members. In 1893 the membership fee, formerly optional, was made obligatory on every student, and at the same time control of the Society was turned over completely to the student body. The present system by which the members elect a President and an executive of fifteen members was instituted at that time. The members of the executive represent the four years and the five Engineering Clubs: Mechanical and Electrical, Chemical, Civil, Architectural, and Mining and Metallurgical.

These Clubs divide the eight departments into groups, and though membership in them is separate from membership in the Engineering Society, and is not compulsory, still they have nearly all the men in School on their lists. The Clubs serve a useful purpose in the social life of the School, and their monthly technical meetings are of real interest and value. The Engineering Society, as a whole, holds a meeting every alternate week, and secures the most outstanding men in the profession to address it on technical subjects of general interest.

One of the most appreciated services which the Society renders is the maintaining of the Engineering Supply Department. This is a small department store, and carries all the materials and instruments needed by the students, together with a very large and varied stock of other commodities.

The Society assumes the financial responsibility for the three

major social functions of the Faculty—the School Dinner, the At-Home, and the Faculty Night at Hart House, and under its present policy directs these by appointing members of the executive to serve as chairmen of the committees in charge of arrangements.

“Transcations,” the official publication of the Society, was first issued in 1886, but in 1907 a monthly magazine was substituted, and this arrangement was retained until 1915, when a new “Transcations,” combined with a “Year Book,” was authorized. This publication contains the addresses given before the Society during the year, and also serves as an annual report of the Society’s activities.

Close co-operation is maintained with other University organizations. The S.P.S. Students’ Christian Association is closely allied with the parent Society, and the Debating Club is affiliated with the larger University Club. A press committee from the Society is appointed to work in conjunction with “The Varsity” and School’s own “Publicity Bureau” to secure proper publication of School news. Interfaculty sporting affairs are financed and promoted by the Society working in close harmony with the Athletic Directorate of the University.

The Society works in a variety of ways, and serves in very many capacities, but every one fills a real need, and though the Society has grown from a very small beginning to its present influential position, there is no reason to suppose that it has reached its limit of usefulness. The utmost good to the greatest number can only be secured by the unselfish co-operation of every member, and as this increases we look for still greater things.

# To the Graduating Class in Dentistry

by

DEAN WALLACE SECCOMBE

---

Young Canadians starting upon their life-work this year, have reason to face the future with unshaken confidence and high hopes. Living in a vast country, immensely rich in natural resources, the eight millions of souls scattered from the Maritimes to the Western Coast may look forward to tremendous future development throughout Canada.

But we must think of Canada's problems in terms of men--educated, trained, tolerant and truth-loving. Indeed the training of men and women to think clearly and to serve is the primary function of College and University. The graduate goes forth carrying the

good name of Dentistry and the University, and there is resting upon his shoulders the obligation of public service.

It is gratifying to know that some of the members of this year's graduating class have selected locations for practice in outlying districts, having in mind the public need for dental service rather than their own personal preference for city practice.

The circumstance of your graduation certifies to the confidence of the College and University in your skill and that you possess to a degree those qualities which are essential in a good citizen and a professional gentleman. But you have yet to prove your worth in the broader and more important fields beyond the College Halls.

The many difficult and unsolved problems of the present day place greater obligations upon College graduates than ever before. The call comes to every one to make a worthy contribution toward the betterment of human conditions and the development of our country.

Combine honesty with industry and skill, and few things will be denied you. Cultivate that spiritual and mental courage that Barrie so eloquently commended to the assembled Red Gowns of St. Andrew's.

Always remain a student. One of the great purposes of a college education is to train the individual to observe and study. Should you fail to be a student after graduation, you have failed to grasp this vital truth.

As a class you are to be congratulated upon your progress throughout your college course. Every member will carry with him the sincerest good wishes of the Faculty and the hope that you may each meet with abundant success.

## Class History of 2T4, R.C.D.S.

---

In beginning this class history we bow to the inevitable by admitting we were lowly Freshmen, but we do not shrink from that admission, because we are aware that all great people have very humble origins. Turning back the hands of the clock then, we came together a band of 165 youths and maidens on a bright September day, some fresh from High School, others from vocational fields and some with the military step still brisk, to the R.C.D.S. and subscribed our first instalment of many good shekels to commence the study of our chosen profession. Dents, 2T4, was thus organized and ran the usual chance of sinking or swimming.

The welding together of our large class was a task not accomplished in a day nor a week. The first step to that end was the vigorous initiation at Varsity stadium, when the boys proved their worth by scaling the wall and carrying battle to the strong Sophomore class. The first year was spent in care-free fashion, skipping lectures at times, patronizing the shows, manufacturing spicy lab. jokes, cheering the Varsity and Dent teams to victory, and with the inevitable boley gauge, carving our "ivories" to the tune of "The Hours I Spent with Thee, Dear Heart."

Sophomore or "Anatomy" year, (when Cunningham's manual was our best friend) found 2T4 a consolidated and hard-working class, ready to patronize the "Frosh" and hold our own with the Juniors, despite inferiority in numerical strength. The latent talent of the class began to unfold slowly and the "Enzymes of 2T4" were much in evidence in every form of college and university activity. Members of the class were prominent in executive, literary, athletic and social fields, while perhaps the outstanding achievement in the athletic firmament was the victory of the Junior Dent Indoor Baseball team over all other faculty teams.

With the fall of 1922 the class started in for "solid dentistry." Our numbers were slightly increased and additional honours came our way. Important executive positions fell to many class members and they did not fail to make good in every particular. The division of the class into three groups was instrumental in possibly lowering the unity of class spirit, but when occasion demanded it 2T4 showed the truth of the maxim "In Unity there is Strength," a test case being in mustering our reserves at critical moments against the "Whizzbangs" to control certain school activities.

In September, 1923, we awoke to find ourselves Seniors. Pardon us, if we moralize a little at this point. In our Freshman days, we looked with reverence and awe on Seniors as a superior species of human life (and as indeed we really believe they now are). In their white gowns they were lords of creation and were subject to homage and respect. Now the wind has turned and the trite saying, "By your inlays shall ye be known," makes us feel quite humble students after all.

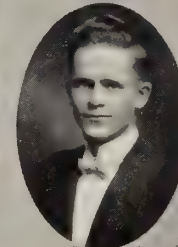

Space forbids but a brief mention of some outstanding events and members of the class on this page. We have been fortunate in having able executive officers to guide the destiny of the class and the success achieved can be largely attributed to their efforts. The class presidents have been as follows: first year, W. A. Paul; second year, F. C. Simms; third year C. J. Clayton and fourth year, M. J. MacDonell. Our S.A.C. representatives: F. C. Simms, W. A. Paul and W. A. Haughton, (third and fourth years). Those occupying seats in the cabinet, in addition to the class presidents: F. C. Simms, President of Parliament; W. A. Paul, Treasurer in 1922-23; E. T. Guest, President R.D.S. in 1922-23; W. J. Howe, "At-Home"; G. F. Edwards, S.C.A.; C. G. Adams, Athletics; H. D. Duncan, Dramatics; C. O. Ramage, Editor of Hya Yaka.

Prominent athletes were George Westman, R. Ferguson, C. G. Adams, S. Lucas, Frank Wood, L. Harris and C. L. Rowland (all first "T" holders). During the year 1922-23, members of our class comprised the larger half of the hockey and indoor baseball teams, which were Interfaculty champions and look good to repeat their performance this year. In the debating field, E. T. Guest must not be overlooked, being a member of winning faculty and university debating teams.

Now we come to the parting of the ways; we have about reached the goal of our ambitions and soon will be travelling the broad highway of life, scattered, never to reassemble as a unit. We have accomplished a little; a great deal lies before us. In parting we extend our heartfelt gratitude to our professors and instructors for their unceasing attention and friendship. Our new Dean, Dr. Wallace Secombe, will have his first graduating class in 2T4. May we be worthy of his ideals and maintain the high standard of our profession. Vivat 2T4.

DEAN HOWE

---

It may be that you sometimes ask yourselves what the necessity is for training foresters in a country of such vast forested areas as Canada. In the first place, I will say that there are forests and forests; there are trees and trees. It does not follow that an area covered with forests is commercially valuable because of their presence, nor that one tree is as good as another for the various purposes of the market. In the neighborhood of seventy different kinds of trees have been used in this country in the wood and timber trade, but a very few species contribute the greater portion of the output.

The manufactured lumber products from our forests increase our national wealth by a quarter of a billion dollars each year. Over two thirds of the above value are contributed by six different kinds of trees. The pulp and paper products reach an annual value of over \$200,000,000 and more than 90 per cent. of this value is furnished by the wood of four kinds of trees.

Briefly, our forest conditions present this problem: Shall we accept for our lumbering and pulpwood industries the wood of constantly decreasing quality which nature, unguided, produces when the equilibrium in the forest has been upset by fire, disease, or logging operations, or shall we exert intelligent effort to maintain our pine, spruce, and other valuable forests and thus supply the forest industries with wood of incomparable quality particularly adapted to their needs?

It is both a challenge to human intelligence and part patriotism to keep the natural forest areas continuously productive in terms of commercially valuable trees—trees whose products annually increase the wealth of the country by nearly a half billion dollars. Hence, the reason for the existence of an institution for the training of foresters.

PRINCIPAL O'MEARA

---

I am an incurable optimist, and I believe one reason for this is that I was born and have always lived in Canada. If I had my choice, in spite of all the difficulties of the times, I would prefer to live now than at any time in the history of the world, and I would rather live in Canada than in any other country. The older I get the more enthusiastic a Canadian I become. It is a big country with lots of elbow room and a welcome for everybody and for all kinds of people. It is a new country, with its history largely yet to be written. We of this generation are building for the future, and you are just starting in upon your task. The success or failure of Canada will largely depend on what we of this generation are, and what we can accomplish. Let us each make sure that we build straight and strong for those who come after us. You are each planning to fit yourself for a position of leadership in life. As you value success obtain a big vision of what is before. See what may be, and have enterprise and pluck sufficient to strive and to attain. Don't forget that there are "Little Canadians" as well as "Little Englanders" in the world to-day. We need courage—the courage of conviction—the courage of those willing to meet and surmount each difficulty and obstacle as it comes. Life without difficulties and dangers to try our mettle would be a very poor experience indeed. The man who really values the true success and greatness of his country must learn to serve from unselfish motives. As you start out into the serious work of life aim primarily, not at getting a living, but at making a real contribution to the life and success of your country and the big world of which it now forms such an important part. That to which you are giving your life is not a mere profession or occupation, it is a calling—a call to serve God and your fellow men with the very best that is in you, and Canada gives you a chance for this unequalled in the world to-day.

# To the Graduating Class of the Veterinary College

*by*

C. D. McGILVRAY

---

The choice of a profession is often a difficult problem for many young men. While there are a few with fixed tendencies or who are brought up under an influence that simplifies their choice, the majority seem to reach a decision only after considerable misgivings. In making a decision one must consider, among other things, personal adaptability, the length and nature of the course of studies, and the opportunities available after graduation. In this regard the veterinary profession is worthy of encouragement as a suitable occupation and field of endeavour for the young man desirous of improving his own status in life and rendering useful service to the community at large. In the first place, it does not necessarily tend to disassociate him from agriculture, but rather to create a greater desire for everything that pertains to the improvement and advancement of certain phases of agriculture, particularly that branch of the industry associated with the management, conservation, breeding and improvement of live stock.

It is universally conceded that live stock is an absolute necessity to successful agricultural development through assisting to maintain soil fertility and by converting the cheaper materials grown on the farm into higher priced finished food products. In the achievement of this, veterinary skill and science materially assist by safeguarding the health of live stock and preventing losses through various ailments and diseases. The properly trained veterinarian, aside from the monetary benefits accruing to himself in professional work, also reciprocally benefits the community at large by preserving the health of animals.

"The live stock industry is the corner-stone of agricultural development and the veterinary profession is its greatest safeguard."

May your best efforts be directed towards the fulfilment of professional usefulness and may you likewise fully realize that "he profits most who serves best."

ONTARIO COLLEGE OF PHARMACY

# To the Graduating Class of Pharmacy

by

DEAN HEEBNER

---

However great the trend towards commercialism, every pharmacist must realize that his professional knowledge takes precedence over all other qualifications and determines his status; he should therefore strive to perfect and enlarge his professional knowledge. He should contribute his share toward the scientific progress of his profession and encourage and participate in research, investigation and study.

The pharmacist must not only possess business training, must not only have a knowledge of the fundamental scientific facts and skill for applying such knowledge, but he must conscientiously adhere to the principles of conduct as set forth in his code of ethics.

Being legally entrusted with the dispensing and sale of narcotic drugs and alcoholic liquors he should merit his responsibility by upholding and conforming to the laws and regulations governing the distribution of these substances.

He should hold the health and safety of his patrons to be of first consideration and make no attempt to prescribe or treat diseases or strive to sell drugs or remedies of any kind for the sake of profit.

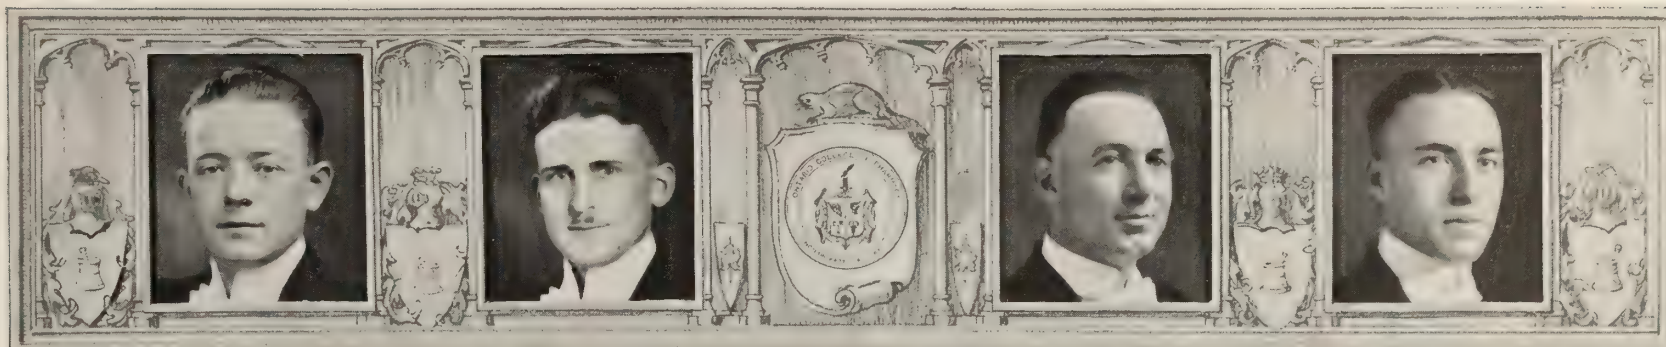

The pharmacist should primarily be a good citizen, and should uphold and defend the laws of the province and nation. He should inform himself concerning the laws, particularly those relating to food and drug adulteration and those pertaining to health and sanitation, and should always be ready to co-operate with the proper authorities having charge of the enforcement of the laws.

He should never discuss the therapeutic effect of a physician's prescription with a patron, nor disclose details of composition which the physician has withheld, suggesting to the patient that such details can be properly discussed with the prescriber only. When an obvious error or omission in a prescription is detected by the pharmacist he should protect the interests of his patron and also the reputation of the medical practitioner by conferring confidentially upon the subject, using the utmost caution and delicacy in handling such an important matter.

He should give due preference to the productions of Canadian manufacturers when satisfied that the usual standards of quality and purity have been met; opportunities of procuring similar articles of foreign make at slightly lower cost, should not be entertained.

## The Joint Executive, Students Administrative Councils

---

THE Joint Executive of the Students Administrative Councils is an organization which, as an important factor in student government, has no parallel in the governing systems of the other great universities and colleges on this continent. That fact became established at the sessions of the Second Biennial Intercollegiate Conference held in April, 1923, at the University of Pennsylvania. Representatives from the Students' Councils of the University of Toronto conveyed to the delegates assembled at this great conference the salient features of our system of student government and administration and aroused much interest by their explanations of the co-operation attained between men and women by means of an united student body, the Joint Executive. The problems of most co-educational institutions in the special sphere of student government revolve about this difficulty of co-ordination of activity between men and women. It was, therefore, a matter of no small moment to the delegates who brought their problems to the round table of the discussion groups to find that a great University had already in operation an executive committee which had demonstrated in a practical way that these problems could be fairly met and overcome.

The Joint Executive, as has been previously stated in articles in this and other publications, was not a sudden conception of student statesmen, reduced to constitutional terms and erected overnight to become an important feature of an established system. It was a development growing out of a business arrangement, which, in the first instance was concerned only with the administration of funds in connection with the publication of "The Varsity" and "Torontonensis." Prior to this arrangement, which was reduced to contract form, passed upon and accepted by both the Men's and Women's Councils, the publication of the undergraduate newspaper and the year book had been under the direct control and supervision of the Students Administrative Council. During the war years, however, the women took so large a part in the maintenance of these publications and proved so valuable an addition to the writing staffs that they established for themselves a right to consideration which it had previously been argued they did not have. The organization

of the Women Students Administrative Council and the request of the women for permission to share in the financing of the publications by payment of the same fee as that paid by the men further strengthened their claim for definite acknowledgement of the right to share in the administration. The difficulty of solving the problems of this joint control of publications was met at first by the contract arrangement referred to, which basis of agreement had to be ratified annually by both Councils. This annual ratification, however, which had to be accomplished before October 15th in each year, and the fact that the existence of a very important part of the student government was dependent upon a contract which gave no accepted constitutional standing to the body which it brought into being, led to the appointment in 1920 of a committee of members from the executives of both Councils to discuss the whole situation with a view to improvement of the existing conditions. This committee recommended the organization of the Joint Executive on a constitutional basis and drew up a draft constitution which, with some alterations, was passed by both Councils, approved by the Caput and established the Joint Executive as an important integral part of student government in the University of Toronto.

The members of the Joint Executive are the members of the executives of the Students Administrative Council and Women Students Administrative Council, the President of the Men's Council being Chairman and the President of the Women's Council Vice-Chairman of the body. It receives and administers the student fees annually collected and supervises the publication of "The Varsity," "Torontonensis" and "The Students' Directory." The appointment of the senior members of the staffs of these publications is made by the Joint Executive on applications and recommendations received and honoraria are paid by it to those appointed. The student body is represented by it in conference with the Caput and it undertakes and carries through many important matters in the interests of the students. In operation, the Joint Executive has proved a valuable body and its duties and responsibilities have annually expanded as its capacity for satisfactory administration has been demonstrated.

## Students' Administrative Council

---

The Students' Administrative Council of the University of Toronto is the servant of all. It exists for this purpose alone in spite of the rather formidable word "administrative" in its title. The councillors for the year 1923-1924 ought to be remembered for their ability to work and their inability to talk, except briefly and to the point.

The Council activities continue to be more varied and more strenuous each year. The venture of publishing a daily "Varsity" has meant more work and co-operation with the Joint Executive. The undergraduate body as a whole has been better served than ever in its newspaper.

As the University develops and grows older, the value of the Council as a medium of direct communication between the student body and the Caput and Board of Governors of the University will become more and more apparent. This year has marked the inauguration of a policy of closer contact between the Council and these bodies and the policy has been amply justified by the results in the way of avoiding misunderstandings and representing student interests.

The Students' Court has not as yet developed into an active body, in spite of the fact that its new constitution, bequeathed to it

by the council of two years ago, is a model of completeness and practicability. It must be noted, however, that the past year was singularly clear of any glaring misdemeanours, on the part of any body of students.

The Literary Organizations' Committee of the Council was responsible for staging three of the most successful debates ever held, although Varsity won only one of them. We had the honour this year of debating, at home, with Oxford, Queen's and Bates', the latter being known in debating circles as "the little college that licked the world." It licked the U. of T.: The Literary Organizations' Committee, in conjunction with the Stewards of Hart House, inaugurated this year a system of parliamentary debates in Hart House. The experiment was eminently successful and it is to be hoped that in the future this will be one of the most notable and popular of the activities of Hart House.

The Council also assisted the Athletic Society in the formation of a Rooters' Club, which did away with the abuses of the old Rooters' Tickets system. The Varsity Glee Club has been carried for another year and was successful in escaping financial embarrassment as well as in giving excellent concerts. Another year will probably see it launched out under independent management as one of the honoured clubs of the University.

## Women Students' Administrative Council

---

The Women Students' Administrative Council has now been in existence for eight years, and is composed of representatives from University College, Victoria College, Trinity College, St. Michael's College, the Faculty of Medicine, Ontario College of Education and the Department of Social Service. The presidents of the undergraduate societies of the first five named, with the General Secretary-Treasurer, who is a graduate, make up the Executive. The offices rotate each year, beginning in 1916-17 with the Presidency in U.C.

The object of the Council is to be the representative organ of the women students of the University. The Council meetings have become a forum for the discussion of all matters affecting the

women of the University as a whole, with the exception of athletics. Matters of import to all women undergraduates are administered through the Council office, a free Book Exchange through which hundreds of books pass yearly is operated, and tickets for the women's sections at games, special convocations, debates and various other events, are handled by the Council.

Since 1918 the women have taken joint financial responsibility with the men in the publication of "The Varsity," "Torontonensis" and "The Students' Directory," and in other matters in which the interests of both men and women are involved. These affairs are all administered by the Joint Executive of the Students' Administrative Councils.

# University Student Christian Associations

## (Men)

---

As we consider in retrospect the progress of another year it is not forgotten that we are constantly entering into the labours of those devoted men "who have gone before."

Some of the pioneers we met when we gathered to celebrate the fiftieth anniversary of the University 'Y' last spring. Then it was that we learned how that work was born out of the obedience of a small group of men to the heavenly vision; a work which survived and grew because men prayed and found strength sufficient for the task,—and finally, "this heritage of fifty years is yours," they said, "and we are with you still, as you in this generation seek to 'carry on'."

Should any student of a future day read this, for such let it be recorded here that on that night we humbly sat at the feet of a group of men whose saintliness of spirit argued irrevocably for the worth of their vision of the Kingdom, and gave us new faith in those things of which we are now trustees.

To-day the name University 'Y' no longer exists, and doubtless on the surface it may seem that perhaps the heritage of fifty years has been lightly regarded. This is far from true, however, for under the Student Christian Associations, all that was vital in the old still persists and the new name is simply an adjustment and

evidence of the desire on the part of students for a more vital expression of their individuality as a group.

In some respects, therefore, the fall term of this year marked the beginning of a new era. We were now one in name, would the passing months evidence a unity of spirit? Towards this end, "to know Jesus," has been the common aim.

Significant as contributing to this chief aim one recalls the glorious September week of fellowship at Elgin House, Muskoka. Likewise the week-end gathering at the Island and Scarboro,—inter-denominational communion services, mid-week chapel services, prayer and study groups, speakers with inspiring messages, such as Eddy, Aggrey, Harrison, Rose, Hatanaka,—(Gray still lives from last year), and not least notable was the inspiration of the Indianapolis Convention. This latter gathering was the means to the accomplishing of a great work. Men and women came back inspired as those who have caught some new and awful vision. Said one, "We saw Jesus," and this assertion was true if one may judge by the light that was in his face.

Finally, what of the future? It has its problems still of Industry, and Race, and War. Yes, but there are students deeply concerned with their solving, and if the Way of Life that is true be faithfully and fearlessly sought then a fairer day has dawned and the future will well take care of itself.

## The Newman Club

---

In accounts of this nature it is customary to relate the aims of the institution. Here the purpose is to tell what has been accomplished during the past year and to let the reader judge for himself the value of the Newman Club and of the services which it renders.

The Newman Club is first, last and always a religious institution. True it holds many other functions, but its primary object is to protect the Catholic faith and morals of its members. A rector, whose attentions are entirely devoted to the needs of the students, is permanently resident at the Club. Mass is celebrated daily. On Sundays special religious services are held, including Benediction and a sermon especially adapted to the student.

The second group of functions is of a literary nature. The club paper, "The Torch," is edited monthly. It not only serves the active members but keeps a large alumni in constant touch with club affairs. Special efforts are directed towards providing opportunities for the members for the development of ability in public speaking. The Newman Club can rightly claim to be the most active organization in this field in the University of Toronto. This year seventeen oratorical contests were held and in addition to

these, two series of debates. The gold and silver medals and the debating shield, presented to the winners of these contests, rank among the highest awards for oratory in the Province of Ontario. This year another feature was added. Such noted authorities as Rev. Brother Gabriel, M.Sc. and Prof. F. H. Kirkpatrick, Ph.B., gave instructions in public speaking. Other literary activities included discussion and lectures on national and civic problems led by prominent men. Up to the time this article was written, this role had been taken by Mr. J. E. Day, K.C.; Mr. W. H. Moore, K.C.; Rev. G. T. Daly, C.S.R., and the Hon. Charles McCrea, M.L.A.

Social events also hold a distinctive place in the life of the club. Included in these are formal and informal dances, skating parties, bridges, and Sunday afternoon teas and musicales.

The club's motto, "Cor ad Cor Loquitur," has been taken from the coat-of-arms of the renowned Cardinal Newman. In every activity, religious, literary and social, a determined and persistent effort is being made to live up to this high and noble ideal.

## “The Varsity”

---

For the Undergraduate Newspaper, the year 1923-1924 was in a sense epochal; last September saw the consummation of the dreams of a long line of former editors, and the culmination of the efforts of others such as Jimmie Cowan, Clarke Ashworth, Russ Williams and Herb McManus, who in more recent times were the moguls of the office; “The Varsity” became a daily. Birth was given unto an entirely new venture, “The Literary Supplement,” four issues of which made their appearance, edited by A. E. C. Jameson and an enthusiastic group of assistants.

In lesser ways has this academic year proven an interesting milestone for “The Varsity.” Many controversies have wrangled their way through the correspondence column, on such questions as religion, professional coaching, and war, without anyone having been convinced that his point of view was wrong. “W.S.M.” and “N.P.H.B.” have covered themselves with glory and damnation, as Dramatic and Music critics respectively. In the editorial columns, A. K. Kembar poured molten epithets upon the querulous accusations of “The Financial Post,” that the University was a hotbed of Communism, and always “The Champus Cat” (alias Dunc. Halliday) continued to emit Golden Thoughts in a never ceasing flow.

The staff has not been without its internal dissensions—and,

on the question of whether or not the women’s staff should be abolished, was divided into three camps: the absolute misogynists, the co-educationalists, and the suffragists. The women’s staff, under Miss Matthew, Miss Spence and Miss Kniveton, has done good work this year and has, unassisted, taken out several issues of “The Varsity,” so that the cause of the misogynists, being now settled in the negative, will have to await the arrival of a new force of male Bolsheviks.

“The Varsity” has two new cards up its sleeve for next year. It will be an associate member of the Canadian Press, and privileged to use the excellent sporting news which that organization supplies, while “The Literary Supplement” will probably take the form of a magazine, issued once a month. It has not been found possible, however, to publish “The Varsity” on Saturday next year, as was at first hoped. This is left for future generations to accomplish.

Lastly, a word of appreciation for the work of Mr. Fred Hastings, Business Manager of “The Varsity” and “Pooh Bah” of the S.A.C. He is resigning his office after four years of faithful service and merits the thanks, appreciation and good will of all who in the past college generation have been students at the University of Toronto.

# Inter-University Debating

---

One of the most hopeful signs to those who are concerned with debating has been the remarkable revival of debating interest shown in the University during the past year. Within three weeks after the term had opened in the fall the University of Toronto debated with Oxford University on the question, "Resolved that this House Approves the French Occupation of the Ruhr." Messrs A. N. Page (St. Michael's), E. T. Guest (Dental College) and J. McCulley (University College) defended the action of the French, while Messrs. A. G. Bagnall, C. O. Scaife and G. O. Gardiner spoke on the negative. The enthusiasm which resulted in a packed audience in Convocation Hall seems to have lasted some time, and manifested itself particularly in three ways. It brought about a desire for more debates, debates of a somewhat different character—more on the Oxford system of open debating—and a more satisfactory way of choosing the men who represent Toronto in inter-university debates.

Numerous challenges were received from American Universities desiring debates, but with conditions as they were it was felt that the only one which could be accepted was one with Bates' College, of Lewiston, Maine, a small college which has won an enviable reputation, having an almost unbroken list of victories to its credit.

The desire for a different type of debate, open to the house, led to the holding of one in the lecture room, Hart House, to which all men of the University were invited. The subject for debate was the approval of the Labour Government in England, and before a crowded house, four set speakers, two undergraduates and two professors, led off on the question, after which the debate was thrown open to all present. The interesting thing was not so much the character of the debating which ensued (although this, while not brilliant, was widespread among the audience), but rather the general enthusiasm and excitement which prevailed. It proved that this sort of debating was more interesting than the purely formal kind which had hitherto been almost universal here. It opened up hopes that it would be possible in the future to hold similar debates every now and then, and that from these debates it would be possible to choose university debaters.

Finally the constitution of the Students' Administrative Council has been changed so that the debating committee (still under the chairmanship of the Convenor of Literary Organizations), shall be

more representative. In future this committee will consist of one representative from each college or faculty desiring such representation, and will not only choose university debaters, but will also be responsible for the holding of a certain number of university debates, probably in Hart House, where men may show their ability. In future debaters will be given some suitable recognition by the Council, probably in the form of a silver medal.

Judging from victories, the Toronto debating teams have not been very fortunate. In the first debate of the year Oxford was given the unanimous decision of the judges. Following a new plan, the audience was also asked to vote, not on the merits of the debaters, but on the question itself, and by a considerable majority it gave its decision against the French, and in favour of the position upheld by Oxford.

In the regular Inter-University Debating League the subject for debate in both groups was, "That the Record of Activities of the League of Nations has Justified its Further Existence." Following the usual custom Toronto defended the affirmative at home and the negative abroad, this year at Kingston against Queen's. In the debate at Toronto Messrs. E. P. Schmidt (School of Graduate Studies) and P. J. Martin (St. Michael's) were successful against McGill, but at Queen's Messrs. F. W. Beare (University College) and A. R. Hubbard (University College) were defeated, and as Queen's also won in Montreal against McGill, Toronto was eliminated, Queen's going into the finals.

Finally, on March 6, Toronto debated against Bates' College on the question, "That this House Approves the American Policy of Non-recognition of the Russian Soviet Government." The negative was taken by Toronto, represented by Messrs. H. M. Bissett (Trinity College) and T. G. Mason (Victoria College), but the Bates' debaters, Messrs. E. D. Canham and W. E. Young, were again successful by unanimous decision of the judges, although in the vote which followed the negative of the question was supported by the audience.

Already there is being planned a debate with Cambridge University in the first weeks of the term next year. There seems to be every reason to hope that with more interest and better organization debating will take a still more prominent place among University activities.

# Athletics

The present session has been a most successful one in University Athletics, judging by the number of students involved and the closely contested games. The traditions of the University were well upheld by the men who wore the blue and white.

The undergraduate members on the Athletic Directorate were Messrs. R. H. Ferguson, John Hyde, R. H. Keebler, D. M. Meekison and R. T. Weaver, with Mr. R. S. S. Chaffe representing the Students' Administrative Council.

(In the photographs reproduced in "Torontonensis" it is not possible, owing to the necessity of going to press early in the year, to collate all the teams of the current academic year. The Rugby, Soccer, Tennis, Track and Harrier, are of the teams that represented the University in the autumn of 1923. The Hockey, Basketball, Boxing, Wrestling and Fencing, etc., are of the teams of the spring of 1923, i.e., the previous academic year, 1922-23).

## RUGBY

Training for the Rugby season commenced on the 15th September, with Mr. Warren Coryell as Hon. Coach of the Senior Team, Dr. L. M. Murray as Hon. Coach of the O.R.F.U. Team, and Mr. Frank W. Fisher, Hon. Coach of the Intermediates and Juniors, and the following graduates assisting: Mr. R. F. Thompson, Mr. M. F. Gibson and Dr. J. C. Maynard. The Senior Team was captained by Mr. G. E. Westman.

While the personnel and spirit of the team was of the highest order, no championships were brought home to Varsity this season; Queen's winning the Senior Intercollegiate and Parkdale Canoe Club the O.R.F.U., R.M.C. the Intermediate Intercollegiate and Loyola the Junior Intercollegiate.

The Mulock Cup series was the most successful in the thirty years of this, our oldest Interfaculty competition, Victoria winning the cup in a brilliant final game against Senior School, with Junior U.C. and Knox as the finalists in their respective groups.

## SOCCER

A partially successful attempt was made to revive the Intercollegiate Championship series, but the only games it was possible to arrange were held in Kingston, where Varsity played the final game against R.M.C. who had defeated Queen's earlier in the same week. The Varsity team was captained by Mr. L. G. C. d'Easum.

No American tour was made on account of the difficulty of getting a satisfactory schedule, but the team from State College, Penn., was brought here, and they provided an interesting contest of the highest order, the game ending in a tie. In the Interfaculty series for the Arts Faculty Cup, O.A.C. were again the victors, with S.P.S. the runners-up.

## TENNIS

The Intercollegiate Tennis Tournament was held in Toronto, McGill again winning, and retaining the cup. For the first time, the University of Montreal entered a team and made a creditable showing in their maiden effort.

The University Championship, represented by the F. Y. McEachren Cup, was won by Mr. F. J. Scott, Med. V.

## TRACK

The Interfaculty Track Meet was held on October 10th, and brought out a larger number of contestants than any previous year. One Inter-Faculty record was broken, that of the Pole Vault, I. E. Francis of U.C. making 12 feet 3½ inches. S.P.S. retained the Cup with 40 points to their credit, with U.C. and Meds not far behind.

At the Intercollegiate Track Meet held at Varsity this year, McGill carried off the honours for the fifth successive year since the war, piling up 62 points against Varsity's 54 and Queen's 9. The most brilliant contest was in the Pole Vault, when I. E. Francis of Varsity won at 12 feet 7 inches, 15 inches above the former Intercollegiate record, made in 1912, and 2 inches above the Canadian record, made fifteen years ago by Archibald. Two other Intercollegiate records went by the boards when Legge of McGill clipped 4/5 sec. off the half mile and Pearce of McGill 1/5 sec. off the 120 yard hurdle. Goforth won the three mile after a close race with Wiggins of McGill. The individual champion of the Meet was Kennedy of McGill, with Vince of Varsity second.

A handsome trophy for Interfaculty competition has been given to the University by the Victoria Athletic Union in memory of William Langford Rowell of Victoria College, elected captain of the Track Team last year, whose untimely death in May last was a distinct loss to University athletics.

## HARRIER

The Interfaculty Harrier Meet was held at Rosedale on Oct. 27, with sixty-nine entries, O.A.C. retaining the Brotherton Cup, and Goforth of U.C. winning first place, making the excellent time of 35 min. 23 1/5 sec., which was 13 sec. better than last year's race.

The Intercollegiate Meet was held the following week over the Rosedale course, Varsity equalling her famous record of 1920 by having five men among the first seven, Goforth leading to the tape with 100 yards to spare, Wiggins, of McGill, second, and Shaver and Turnbull, of Varsity, tying for third place. Goforth's time was 34 min. 17 2/5 sec., which is considered good in spite of the muddy course. Thus Varsity has held the Little Cup continuously since the revival of Intercollegiate Athletics after the war.

## HOCKEY

The Hockey Club had a most successful season, Varsity again retaining the Queen's Cup in the Senior Intercollegiate. The Intermediate team, after a hard race, were beaten by Osgoode Hall, the infant member of the Intercollegiate Series, there being no Western Division in the Junior Intercollegiate this year. In the O.H.A. competition, the Senior Team finished second, losing after two hardly contested and well played games. In the Junior Series Varsity were close contenders, losing to Owen Sound in the semi-finals. Mr. Beattie Ramsay, Hon. Coach, having been selected for the Olympic Hockey Team, his place was taken by Mr. Conn Smythe, B.A.Sc., formerly Hon. Coach of the Juniors, who in a most efficient manner looked after the interests of the three teams, and to whom great credit is due for developing a high standard in Hockey. Mr. Louis Hudson ably captained the Senior Team.

In the Jennings Cup Series, 17 teams were entered, and notwithstanding the uncertainty of the weather, the competitions were completed in record time, thus reflecting great credit upon the management of Mr. R. M. Laurie and his associates. The group winners were Forestry, Jr. Dents, St. Michael's, Victoria and Senior Meds. Senior Meds won the Cup with Jr. Dents as runners-up.

## BASKETBALL

The Senior Intercollegiate Series was won this year by Queen's university for the first time in history. Varsity started off successfully but Queen's developed unexpected strength, and in the play-off in Montreal, which was found necessary to decide the championship, Varsity was nosed out by Queen's by one point.

All credit is due to Captain Caple and Dr. D. C. Gill, the Hon. Coach, for the splendid showing made by Varsity.

In the Sifton Cup series, 18 teams were entered, the larger Faculties being represented by two teams. The group winners were Jr. U.C., Jr. Meds., Sr. Meds., Sr. U.C., Jr. School, Wycliffe. Junior Meds won the series after close competition.

## BOXING, WRESTLING AND FENCING

The Intercollegiate Assault was held at McGill this year, and resulted in a brilliant victory for Varsity under the Captaincy of Les Black. Varsity had the strongest team in some years, winning twelve events to McGill's five; Varsity winning six Boxing events and six Wrestling events, the Fencing honours going to McGill.

In the Interfaculty Meet, held the previous week, O.A.C. again retained the Francis Davison Cup in one of the best handled and well contested tournaments in Varsity's history. O.A.C.'s exceptionally good wrestlers gave a remarkable exhibition, their total score being 34, with Meds 30, S.P.S. 25, and Dents 22.

## SWIMMING AND WATER POLO

At the Interfaculty competitions held this year, the Fitzgerald Cup for Swimming and the Eckhardt Cup for Water Polo were again won by U.C.

At the Intercollegiate Swimming Meet, held at McGill on Feb. 9th, the McGill swimmers defeated the Varsity team. Three records were broken, all by McGill contestants, namely Vernot in the 100 yard breast, and Bourne in the 100 yard free style, while the relay team established a new record of 1 min. 44 1/5 sec. for 200 yards. In the Water Polo games McGill also maintained their superiority.

The teams were captained by J. L. Uren in the Swimming, and Frank Wood for the Water Polo.

## LACROSSE

The Lacrosse team made its usual spring tour in the United States under the management of A. R. McGee, meeting teams of several of the American Colleges.

## GYMNASIUM

The Intercollegiate Assault-at-Arms was held at McGill this year, the contest being between McGill and Varsity. The championship was won by Varsity by a margin of 24 points. The team, under the management of I. W. Mix, was one of the best that has represented Varsity for some years.

## ROWING

The Rowing Club, under Professor Loudon's coaching, was successful in retaining the Hanlan Memorial Trophy for the Senior Eights at the Canadian Henley Regatta, and the Intermediate, Junior and Tack Weight Crews, while not winning their respective championships, made very creditable showings in the contests in which they were engaged.

## ENGLISH RUGBY

Home and home games were played with McGill, resulting in a victory for the Varsity team in the aggregate number of points scored. Mr. H. M. S. Pentelow, a player of international reputation, ably captained the team this year.

## INDOOR BASEBALL

The Indoor Baseball Interfaculty series enlisted 13 teams, and a closely contested series resulted. The championship and the Spalding Cup were won by Senior Dents.

## A National Store and the National Life

**THE T. EATON CO<sup>o</sup> LIMITED** with its buying offices in the great world centres, its Stores in Toronto and Winnipeg, its Mail Order Branches and Factories throughout Canada is an impressive factor in the life of the country. Over twelve thousand people are employed by **THE T. EATON CO<sup>o</sup> LIMITED** in Toronto alone, and for its employees the firm maintains a Welfare Department with nurses and two hospitals, the Eaton Boys' Camp, the Girls' Camp at Shadow Lake, and the Eaton Girls' Club with gymnasium, swimming tank, classrooms, etc.

### FOUNDED ON FOUR PRINCIPLES

At the opening of the Store in 1869 this policy was outlined by the founder, Mr. Timothy Eaton. We purpose to sell our goods for cash only; in selling goods to have only one price. Goods satisfactory or money refunded. No one is to be importuned to buy. These principles have been carried out by successive presidents and form the mainspring of the Store to-day.

### AN INSTITUTION FOR SERVICE

Not only in the primary business of a Store—that of selling merchandise—but in all the opportunities that occur to add to the comfort and convenience of customers, **THE T. EATON CO<sup>o</sup> LIMITED** has made its mark. It maintains a customers' deposit account with monthly statements of expenditure and substantial rate of interest, a *Shopping Service* which buys by proxy for out-of-town and other customers, a *City Order* Department for the convenience of those telephoning, a playground for children, and a *rest room*.

### OTHER STORE CONVENIENCES

Post Office and Information Bureau.	Pay Telephones.
Lost and Found Offices.	Georgian Room—the palatial new restaurant on the Ninth Floor.
Adjusting Offices.	
Free Parcel Check Room.	Lunch Room and Cafeteria.

### SOME FACTS AND FIGURES

The delivery of goods requires three hundred and forty-eight horses, two hundred and twenty-five wagons and seventy motor cars.

A pneumatic tube system for cash and change has two hundred and seventeen stations, with miles of brass tubing; carriers speed through these at sixteen feet a second. Also 200 Cash Registers which help towards speedy, efficient service.

There are thirty-two passenger elevators in use.

Eight escalators, or moving stairways, commodiously carry thousands of people daily from the ground floor to the second, third or fourth floors.

For freight there are forty-two elevators running.

Three spiral chutes from the fifth floor to the basement carry parcels by gravity to the delivery section.

Four hundred and forty Bell telephones connect with the various departments. Of these, 120 lines give a direct connection with the Grocery, Meat, Drug or City Order Departments.

Four hundred and fifty "local" telephones are used for facilitating the internal business of the organization.

An automatic sprinkler system covers the building for fire protection.
